Exam REVIEW, 2014-11-28 CISA and CISM are NOT pure technical certs In fact they tend to focus more on the policies programs auditing and management side of IS There are technical questions but the questions are not like those that you find in the MS Cisco exams You need to know the basics of new IT technologies but you also need to know the older technologies since many old stuff are still at work in the modern business world CISA and CISM are supposed to be different in that one focuses on auditing and another on management HOWEVER they are practically sharing many of the knowledge areas This book focuses more on the audit track We also reference the latest available guidelines published by ISACA When we develop our material we do not classify topics the BOK way We follow our own flow of instructions which we think is more logical for

the overall learning process Don't worry it does not hurt to do so as long as you truly comprehend the material To succeed in the exams you need to read as many reference books as possible There is no single book that can cover everything
