

CITADEL

CONVERSION CHART

To use this chart, simply look up the old Citadel Colour in the top bar and you'll get the best match from the new paint range shown on the accompanying swatch.

This conversion chart allows you to get a good match between colours from our old and new paint range – especially useful if you're mid-project and you need to restock your paint supply. Be aware that as the new paint range comprises brand-new formulations we can suggest close, but not exact comparisons. While we're comparing old and new, it's worth noting the new Citadel Paint range is far larger. In fact, it's doubled in size, with over 70 additional colours to expand your palette and further enhance your models.

Modelling Battle of Britain

Fighter Aircraft Andy Singleton, 2025-08-30 Andy Singleton in association with the Kent Battle of Britain Museum has produced an excellent guide to building and painting scale models of the iconic fighters involved in that critical struggle. Aimed at beginner and intermediate modellers, the step by step instructions will help the reader build a Supermarine Spitfire, Bolton Paul Defiant, Messerschmitt Bf109 and Messerschmitt Bf110. Each build represents either an aircraft type or colour scheme used during the Battle of Britain and Blitz periods. Archive photographs from the Kent Battle of Britain Museum support each build along with historical information on the part played by that particular plane and its crew in the battle. Each stage of the instructions is accompanied by a colour photograph and they guide the user through the process from the tools and materials required, preparation and construction of the model, painting using both brush and airbrush and applying decals. There is even advice on displaying the finished models and incorporating them into dioramas and on painting pilots and aircrew. It is packed full of professional hints and tricks of the trade, allowing the reader to create worthy scale tributes to these legendary aircraft.
