Citizen Participation In Science Policy

Carlo Martini, Marcel Boumans

Citizen Participation In Science Policy:

Citizen Participation in Science Policy James C. Petersen, 1982 **Citizen Participation in Science Policy** James C. Petersen, 1984 The first book length analysis of citizen participation in the formulation of scientific and technical policy Twelve essays and case studies examine important examples of citizen activism place them within the context of larger participatory movements explore the variety of forms citizen participation may take and consider new alternatives for public involvement Special attention is given to public health policy and nuclear power development Additional contributors are Jayanta Bandyopadhyay Barry Checkoway Daryl Chubin Diana Dutton Rachelle Hollander John P Hunt Neil H Katz Sheldon Krinsky Jane Kronick Dorothy Nelkin Alan Porter Frederick A Rossini Randy Rydell and Vandana Shiva Citizen Participation in Global Environmental Governance Richard Worthington, Mikko Rask, Lammi Minna, 2013-11-12 On one day in 2009 in thirty eight countries around the world 4 000 ordinary citizens gathered to discuss the future of climate policy This project WWViews was the first ever global democratic deliberation an attempt to enable ordinary people to reach informed decisions on and impact the global policy process This book which analyzes the experiences and lessons from this ground breaking event marks the beginning of a new kind of democratic politics providing practical lessons on how to increase the impact of global deliberation projects within the media and on official policy processes The authors explore important themes for participatory approaches from the local to the global the role of deliberation within global governance methodology and practice participant selection policy impacts engaging the media how policy culture affects deliberation uptake capacity building and knowledge transfer process evaluation content and argumentation analysis gender race and class aspects The global aims of the WWViews project along with the opportunity to evaluate the same process in different national and cultural contexts makes this a hugely valuable and informative study for all those interested in democratic deliberation and environmental governance from the small to the international scale Public Participation Handbook , 1985 **But is it True?** Aaron B. Wildavsky, 1995 Amid the chaos of questions and conflicting information Aaron Wildavsky arrives with just what the beleaguered citizen needs a clear fair and factual look at how the rival claims of environmentalists and industrialists work what they mean and where to start sorting them out **The Age of Direct Citizen Participation** Nancy C. Roberts, 2015-01-28 Citizen involvement is considered the cornerstone of democratic theory and practice Citizens today have the knowledge and ability to participate more fully in the political technical and administrative decisions that affect them On the other hand direct citizen participation is often viewed with skepticism even wariness Many argue that citizens do not have the time preparation or interest to be directly involved in public affairs and suggest instead that representative democracy or indirect citizen participation is the most effective form of government Some of the very best writings on this key topic which is at the root of the entire reinventing government movement can be found in the journals that ASPA publishes or sponsors In this collection Nancy Roberts has brought together the emerging classics on the ongoing debate

over citizen involvement Her detailed introductory essay and section openers frame the key issues provide historical context and fill in any gaps not directly covered by the articles More than just an anthology The Age of Direct Citizen Participation provides a unique and useful framework for understanding this important subject It is an ideal resource for any Public Administration course involving citizen engagement and performance management **Impure Science** Steven Epstein,1996 Epstein shows the extent to which AIDS research has been a social and political phenomenon and how the AIDS movement has transformed biomedical research practices through its capacity to garner credibility by novel strategies

Special Reference Briefs ,1983 **OECD Public Governance Reviews OECD Guidelines for Citizen Participation Processes** OECD,2022-09-24 The OECD Guidelines for Citizen Participation Processes are intended for any public official or public institution interested in carrying out a citizen participation process The guidelines describe ten steps for designing planning implementing and evaluating a citizen participation process and discuss eight different methods for involving citizens information and data open meetings public consultations open innovation citizen science civic monitoring participatory budgeting and representative deliberative processes The guidelines are illustrated with examples as well as practical guidance built on evidence gathered by the OECD Finally nine guiding principles are presented to help ensure the quality of these processes *Citizens, Experts, and the Environment* Frank Fischer,2000-12-19 Claims that the problematic communication gap between experts and ordinary citizens is best remedied by a renewal of local citizen participation in deliberative structures **Recombinant DNA Research , Handbook of Science and Technology Studies** Sheila Jasanoff,Gerald E Markle,James C Peterson,Trevor Pinch,2001-11-01 This volume represents the social constructivist turn of the field It is evident that social constructivism made a major impact on the field during the 1970s and 1980s The diverse papers included here highlight the role of ethnography in STS In addition we are exposed to new perspectives of the multicultural and gendered nature of knowledge production Science Technology and Society For the most current comprehensive resource in this rapidly evolving field look no further than the Revised Edition of the Handbook of Science and Technology Studies This masterful volume is the first resource in more than 15 years to define summarize and synthesize this complex multidisciplinary international field Tightly edited with contributions by an internationally recognized team of leading scholars this volume addresses the crucial contemporary issues both traditional and nonconventional social studies political studies and humanistic studies in this changing field Containing theoretical essays extensive literature reviews and detailed case studies this remarkable volume clearly sets the standard for the field It does nothing less than establish itself as the benchmark one that will carry the field well into the next century The long awaited Handbook of Science and Technology Studies sponsored by the Society for Social Studies of Science is a truly substantial work both in size and in the breadth of its many contributions It is a rich and valuable guide to much that is transpiring in the field of Science and Technology Studies In the editors words it is an unconventional but arresting atlas of the field at a particular moment in its history Science

Technology Society This book is not only an important resource for practitioners but it also may help to spark the curiosity of those who are outside the field including scientists and engineers themselves and so pull the half seen world of science and technology studies even more fully into the light of day American Scientist The book as a whole is an impressive testimony to the vitality of a burgeoning field New Scientist It reflects the international and interdisciplinary nature of the society An excellent resource Choice

Citizen Participation in Environmental Affairs, 1970-1986 Frederick Frankena, Joann Koelln Frankena, 1988 *Routledge International Handbook of Ignorance Studies* Matthias Gross, Linsey

McGoey, 2015-05-15 Once treated as the absence of knowledge ignorance today has become a highly influential topic in its own right commanding growing attention across the natural and social sciences where a wide range of scholars have begun to explore the social life and political issues involved in the distribution and strategic use of not knowing The field is growing fast and this handbook reflects this interdisciplinary field of study by drawing contributions from economics sociology history philosophy cultural studies anthropology feminist studies and related fields in order to serve as a seminal guide to the political legal and social uses of ignorance in social and political life Chapter 33 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available here https://tandfbis.s3.us-west-2.amazonaws.com/rftfiles/docs/OpenAccess/Chapters/9780415718967_oachapter33.pdf

Experts and Consensus in Social Science Carlo Martini, Marcel Boumans, 2014-09-11 This book brings together the research of philosophers sociologists and social scientists It examines those areas of scientific practice where reliance on the subjective judgment of experts and practitioners is the main source of useful knowledge to address and possibly bring solutions to social problems A common phenomenon in applications of science is that objective evidence does not point to a single answer or solution to a problem Reliance on subjective judgment then becomes necessary despite the known fact that hunches even those of putative experts often provide information that is not very accurate and that experts are prone to fallacies and biases The book looks at how experts reach consensus in the social sciences and which experts are relevant to which problems It aims to answer many questions the main one being Can we start building a normative theory of expertise on the basis of the evidence that social scientists sociologists and philosophers have uncovered

The Science of Citizen Science Katrin Vohland, Anne Land-zandstra, Luigi Ceccaroni, Rob Lemmens, Josep Perelló, Marisa Ponti, Roeland Samson, Katherin Wagenknecht, 2021-01-11 This open access book discusses how the involvement of citizens into scientific endeavors is expected to contribute to solve the big challenges of our time such as climate change and the loss of biodiversity growing inequalities within and between societies and the sustainability turn The field of citizen science has been growing in recent decades Many different stakeholders from scientists to citizens and from policy makers to environmental organisations have been involved in its practice In addition many scientists also study citizen science as a research approach and as a way for science and society to interact and collaborate This book provides a representation of the practices as well

as scientific and societal outcomes in different disciplines It reflects the contribution of citizen science to societal development education or innovation and provides an overview of the field of actors as well as on tools and guidelines It serves as an introduction for anyone who wants to get involved in and learn more about the science of citizen science

Climate Change and Society Fátima Alves ,Luísa Schmidt,2022-11-01 **Analysing Citizenship Talk** Heiko

Hausendorf,Alfons Bora,2006-01-01 Citizenship talk refers to various types of discourse initiated to make citizens take part in politically and socially contested decision making processes citizen participation Citizenship has accordingly become one of the dazzling key words whenever the democratic deficit of modern societies is moaned about Asking for citizenship to be conceived of as a communicative achievement the present book shows that sociolinguistics and pragmatics can essentially contribute to this interdisciplinary up to date issue of research the volume offers a theoretically innovative concept of communicated citizenship and it presents a set of methodological approaches suited to deal with this concept at an empirical level including contributions from Conversation Analysis Critical Discourse Analysis Social Positioning Theory Speech Act Theory and Ethnography Furthermore concrete data and empirical analyses are provided which take up the case of decision making processes around the application of modern green biotechnology GMO field trials The volume thus illustrates the kind of findings and results that can be expected from this new and promising approach towards citizenship talk

Scientists, Experts, and Civic Engagement Amy E. Lesen,2016-04-01 How do scientists scholars and other experts engage with the general public and with the communities affected by their work or residing in their sites of study Where are the fine lines between public scholarship civic engagement and activism Must academics give back once they collect data and publish results In this volume authors from a wide range of disciplines examine these relationships to assess how they can be fruitful or challenging Describing the methodological and ethical issues that experts must consider when carrying out public scholarship this book includes a checklist for critical factors of success in engagement and an examination of the role of digital social media in science communication Illustrated by a range of case studies addressing environmental issues climate change resource use post disaster policy and education it offers an investigation into the levels and ways in which scholars can engage and how and whether academics and experts who engage in community work and public scholarship are acknowledged and rewarded for doing so by their institutions Also bringing into the debate the perspective of citizens who have collaborated with academics the book offers an exploration of the democratizing potential of participatory action research

International Perspectives on Engineering Education Steen Hyldgaard Christensen,Christelle Didier,Andrew Jamison,Martin Meganck,Carl Mitcham,Byron Newberry,2015-05-25 This inclusive cross cultural study rethinks the nexus between engineering education and context In so doing the book offers a reflection on contextual boundaries with an overall boundary crossing ambition and juxtaposes important cases of critical participation within engineering education with sophisticated scholarly reflection on both opportunities and discontents Whether and in what way

engineering education is or ought to be contextualized or de contextualized is an object of heated debate among engineering educators The uniqueness of this study is that this debate is given comprehensive coverage presenting both instrumentally inclined as well as radical positions on transforming engineering education In contextualizing engineering education this book offers diverse commentary from a range of disciplinary meta and interdisciplinary perspectives on how cultural professional institutional and educational systems contexts shape histories structural dynamics ideologies and challenges as well as new pathways in engineering education Topics addressed include examining engineering education in countries ranging from India to America to racial and gender equity in engineering education and incorporating social awareness into the area Using context as bridge this book confronts engineering education head on Contending engineering ideologies and corresponding views on context are juxtaposed with contending discourses of reform The uniqueness of the book is that it brings together scholars from the humanities the social sciences and engineering from Europe both East and West with the United States China Brazil India and Australia
