Cibse Guide Lux Stairwell:

Principles of Element Design Peter Rich, Yvonne Dean, 2012-10-02 The construction of buildings is learnt through experience and the inheritance of a tradition in forming buildings over several thousand years Successful construction learns from this experience which becomes embodied in principles of application Though materials and techniques change various elements have to perform the same function Principles of Element Design identifies all the relevant elements and then breaks these elements down into all their basic constituents making it possible for students to fully understand the given theory and principles behind each part As all building projects are subject to guidance through the Building Regulations and British Standards this book gives an immediate reference back to relevant information to help practitioners and contractors identify key documents needed Yvonne Dean B A Hons B A Open RIBA an architect energy consultant and materials technologist She also has 15 years experience as a lecturer travels widely and is a guest lecturer at many universities She pioneered an access course for Women into Architecture and Building which has been used as a template by others and has been instrumental in helping to change the teaching of technology for architects and designers Peter Rich AA Dipl Hons Architect started his career with 14 years experience as a qualified architectural technician He then joined the AA School of Architecture working with Bill Allen and John Bickerdike after his graduation later becoming a partner of Bickerdike Allen Rich and Partners He also taught building construction at the Bartlett School of Architecture University College London and architectural design at the Polytechnic of North London He now acts as a Consultant

Using the Building Regulations: Part M Access Melanie Smith, 2006-08-11 This informative book takes the practitioner through the requirements for Part M of the Building Regulations explaining and expanding the guidance given in the Approved Document and comparing the advice in BS83000 and other relevant publications Access statements are demystified and the implications for the building in use under the Disability Discrimination Act are clarified It will inform all those working within the built environment enabling them to deal with a complex and evolving area of the law which directly affects everyone As with the other books in the Using the Building Regulations series Part M Access goes far beyond analysis of the Regulations and Documents themselves and offers practical advice on using not just the traditional routes to compliance but also on the alternative approaches suggested but not explained in the Approved Documents The advantages and disadvantages of each form of compliance are analysed in depth

Building Services Journal ,2004

Care Homes for Older People Judith Torrington, 2003-09-02 The provision of care for older people has changed radically over the past ten years and building facilities need to reflect this change Written by an architect and specialist in the design of residential and nursing homes this book describes the needs of the users provides detailed design guidance and summarises building procurement techniques The commissioners of building work and their designers of buildings will find this an invaluable reference

Sustainable Construction Sandy Halliday, 2008-01-14 It has taken a very long time for sustainable development to be recognised as a justified restraint on inappropriate development

and a primary driver of improving quality of life for all For designers clients and project managers this means we have to create healthy buildings and places which support communities enhance biodiversity and contribute to reversing unsustainable trends in pollution and resource consumption It is a very positive agenda This groundbreaking book will help all building design management and cost professionals to understand sustainable design and provide the technical skills needed to implement the most up to date concepts Based on a hugely successful series of workshops for professionals in construction the book covers the history of ideas materials measurement both cost and benchmarking performance environmental services and the building design and delivery process through to post occupancy evaluation It covers individual buildings and the urban scale Sustainable Construction is a master class in how to achieve practical affordable replicable sustainable design It has something new and often surprising in it for everybody in the construction industry For the Architect and Engineer it gives chapter and verse to the basic design issues at all scales and through the whole of the plan of work For Quantity Surveyors and cost professionals it challenges current conventions with researched case study evidence For clients and project managers it outlines the drivers and the justification for a sustainable approach and outlines the legislative framework and it gives guidance on procurement and project and site management issues For contractors and developers it contains a wealth of case study material rooted in practical experience and economic reality For teachers and students it will bust myths liberate thinking and inform design

Disabled Access to Facilities Ian Waterman, Janet Bell, 2013-06-17 A practical and comprehensive guide to a service provider s duties under Part III 2004 of the Disability Discrimination Act 1995

Hospitality ,2003
