Cities And The Wealth Of Nations:

Cities and the Wealth of Nations Jane Jacobs, 1984 Learned iconoclastic and exciting Jacobs diagnosis of the decay of cities in an increasingly integrated world economy is on the mark New York Times Book Review Jacobs book is inspired idiosyncratic and personal It is written with verve and humor for a work of embattled theory it is wonderfully concrete and its leaps are breathtaking Los Angeles Times Not only comprehensible but entertaining Like Mrs Jacobs other books it offers a concrete approach to an abstract and elusive subject That all by itself makes for an intoxicating experience New York Times

Critical theories **Key Thinkers on Cities** Regan Koch, Alan Latham, 2017-05-22 *Key Thinkers on Cities* provides an engaging introduction to the dynamic intellectual field of urban studies. It profiles the work of 40 innovative thinkers who represent the broad reach of contemporary urban scholarship and whose ideas have shaped the way cities around the world are understood, researched, debated, and acted upon. Providing a synoptic overview that spans a wide range of academic and professional disciplines, theoretical perspectives, and methodological approaches, the entry for each key thinker comprises a succinct introduction and overview, intellectual biography, and research focus. An explication of key ideas, contributions to urban studies. The book offers a fresh look at well-known thinkers who have been foundational to urban scholarship, including Jane Jacobs, Henri Lefebvre, Manuel Castells, and David Harvey. It also incorporates those who have helped to bring a concern for cities to more widespread audiences, such as Jan Gehl, Mike Davis, and Enrique Peñalosa. Notably, the book also includes a range of thinkers who have more recently begun to shape the study of cities through engagements with art, architecture, computer modelling, ethnography, public health, post-colonial theory, and more. With an introduction that provides a mapping of the current transdisciplinary field and individual entries by those currently involved in cutting-edge urban research in the Global North and South, this book promises to be an essential text for anyone interested in the study of cities and urban life. It will be of use to those in the fields of anthropology, economics, geography, sociology, and urban planning. *The Money Changers* David Boyle, 2015-12-22 Since money was invented, there has been a debate about better ways of creating it and better rules to govern how it works, until the last generation when it began to seem that the money system had been handed down by God and remained unchanged ever since. But the last few years have seen an increasingly powerful resurgence of interest in changing the system fundamentally and bringing the monetary trends that affect all our lives under our control. Few realize that the debate has roots and a tradition covering mainstream economists like Keynes and Hayek, statesmen like Lincoln, entrepreneurs like Ford and Soros, as well as the imaginative mavericks behind local currencies and e-money. This volume collects together some of their most influential writings to provide a handbook on a vital train of ideas and a guide to a debate on changing money that is becoming increasingly important. **Cities and the Creative Class** Richard Florida, 2005-07-22 In his compelling follow-up to *The Rise of the Creative Class*, Richard Florida outlines how certain cities succeed in attracting members of the creative class—the millions of people who work in information-age economic sectors and in industries driven by innovation and talent. *The City Creative* Michael H. Carriere, David Schalliol, 2021-04-18 In the wake of the Great Recession, American cities from Philadelphia to San Diego saw an upsurge in hyperlocal placemaking: small-scale interventions aimed at encouraging greater equity and community engagement in growth and renewal. But the projects that were the most successful at achieving these lofty ambitions weren't usually established by politicians, urban planners, or real estate developers; they were initiated by community activists, artists, and neighbors. In order to figure out why *The City Creative* mounts a comprehensive study of placemaking in urban America, tracing its intellectual history and contrasting it

with the efforts of people making positive change in their communities today Spanning the 1950s to the post recession 2010s The City Creative highlights the roles of such prominent individuals and organizations as Jane Jacobs Christopher Alexander Richard Sennett Project for Public Spaces and the National Endowment for the Arts in the development of urban placemaking both in the abstract and on the ground But that s only half the story Bringing the narrative to the present Michael H Carriere and David Schalliol also detail placemaking interventions at more than 200 sites in more than 40 cities combining archival research interviews participant observation and Schalliol s powerful documentary photography Carriere and Schalliol find that while these formal and informal placemaking interventions can bridge local community development and regional economic plans more often than not they push the boundaries of mainstream placemaking Rather than simply stressing sociability or market driven economic development these initiatives offer an alternative model of community led progress with the potential to redistribute valuable resources while producing tangible and intangible benefits for their communities The City Creative provides a kaleidoscopic overview of how these initiatives grow and sometimes collapse illustrating the centrality of placemaking in the evolution of the American city and how it can be reoriented to meet demands for a more equitable future
