Chairmaking And Design:

Chairmaking and Design Jeff Miller, 1997 Chairmaking is widely considered to be the pinnacle of the woodworker's art. Mysterious. Intimidating. Impossible. The reality is that chairmaking is fulfilling, rewarding, and fun. *Chairmaking and Design*, 2007

The Art of Chairmaking Jason Mosseri, 2025-06-10 The Art of Chairmaking is the definitive guide to making Windsor chairs with essential information on tools, materials, and techniques. Windsor chairs, where the legs are mortised into the seat and don't form the backrest, are known for their striking elegance and comfort. This book is the perfect introduction to the art of making these distinctive chairs, clearly explaining every step from selecting the right wood and setting up a workshop to using a lathe to create ornate legs and how to form a perfectly shaped seat. With detailed step-by-step photography and clear construction diagrams, this book is a one-stop resource for aspiring and experienced chair makers alike. The Art of Chairmaking includes projects for 5 classic furniture designs, including a 3-legged round stool, square table, simple bench, curve armchair, and comb back armchair.

Participatory Design Douglas Schuler, Aki Namioka, 1993-03-01 The voices in this collection are primarily those of researchers and developers concerned with bringing knowledge of technological possibilities to bear on informed and effective system design. Their efforts are distinguished from many previous writings on system development by their central and abiding reliance on direct and continuous interaction with those who are the ultimate arbiters of system adequacy: namely, those who will use the technology in their everyday lives and work. A key issue throughout is the question of who does what to whom, whose interests are at stake, who initiates action and for what reason, who defines the problem, and who decides that there is one. The papers presented follow in the footsteps of a small but growing international community of scholars and practitioners of participatory systems design. Many of the original European perspectives are represented here, as well as some new and distinctively American approaches. The collection is characterized by a rich and diverse set of perspectives and experiences that, despite their differences, share a distinctive spirit and direction: a more humane, creative, and effective relationship between those involved in technology's design and use and between technology and the human activities that motivate the technology.

Chairmaking in Appalachia Michael Owen Jones, 1969

Craftsman of the Cumberlands Michael Owen Jones, 2021-10-21 Why do people consider aesthetic qualities as well as utilitarian ones in the making of everyday objects? Why do they maintain traditions? What is the nature of their creative process? These are some of the larger questions addressed by Michael Owen Jones in his book on craftsmen in the Cumberland Mountains of eastern Kentucky. Concentrating on the work of one man, woodworker and chairmaker Chester Cornett Jones, not only describes the tools and techniques employed by Cornett but also his aspirations and values. Cornett possessed a deep knowledge of his materials and a mastery of construction methods. Some of his chairs represent not objects of utility but aesthetic developments of the chair form. Cornett sought to cope with the problems of his life. Jones maintains their massiveness provided a sense of security, the virtuosity of their design and construction, a feeling of self-esteem. Jones
