Research in Computer Security ESORICS has a tradition that goes back two decades. It tries to bring together the international research community in a top quality event that covers all the areas of computer security ranging from theory to applications. ESORICS 2010 was the 15th edition of the event. It was held in Athens, Greece, September 20-22, 2010. The conference received 201 submissions. The papers went through a careful review process. In a first round, each paper received three independent reviews. For the majority of the papers, an electronic discussion was also organized to arrive at the final decision. As a result of the review process, 42 papers were selected for the final program, resulting in an acceptance rate of as low as 21%. The authors of accepted papers were requested to revise their papers based on the comments received. The program was completed with an invited talk by Udo Helmreich, Executive Director of ENISA (European Network and Information Security Agency). ESORICS 2010 was organized under the aegis of three Ministries of the Government of Greece: namely, the Ministry of Infrastructure, Transport and Networks; the General Secretariat for Information Systems of the Ministry of Economy and Finance; and the General Secretariat for the Governance of the Ministry of Interior, Decentralization and the Government.
