Challenging Global Finance Elizabeth Friesen, 2012-01-25 Friesen demonstrates how transnational CSOs and NGOs can influence the context in which international political decisions are made. Towards the Dignity of Difference? Mojtaba Mahdavi, 2016-02-24 The rise of popular social movements throughout the Middle East, North Africa, Europe, and North America in 2011 challenged two hegemonic discourses of the post-Cold War era: Francis Fukuyama's *The End of History* and Samuel Huntington's *The Clash of Civilizations*. The quest for genuine democracy and social justice and the backlash against the neoliberal order is a common theme in the global mass protests in the West and the East. This is no less than a discursive paradigm shift, a new beginning to the history, a move towards new alternatives to the status quo. This book is about difference and dialogue; it embraces *The Dignity of Difference* and promotes dialogue. However, it also demonstrates the limits of dialogue as a useful and universal approach for resolving conflicts, particularly in cases involving asymmetric and unequal power relations. The distinguished group of authors suggests in this volume that there is a third way of addressing global tensions, one that rejects the extremes of both universalism and particularism. This third way is a radical call for an epistemic shift in our understanding of us/other and good/evil, a radical approach toward accommodating difference as well as embracing the plural concept of the good. The authors strengthen their alternative approach with a practical policy guide by challenging existing policies that either exclude or assimilate other cultures, that wage the constructed global war on terror, and that impose a western neo-liberal discourse on non-western societies. This important book will be essential reading for all those studying civilizations, globalization, foreign policy, peace and security studies, multiculturalism, and ethnicity, regionalism, global governance, and international political economy.

The Bankers' Blacklist Julia C. Morse, 2022-01-15 In *The Bankers' Blacklist*, Julia C. Morse demonstrates how the Financial Action Task Force (FATF) has enlisted global banks in the effort to

keep bad money out of the financial system in the process drastically altering the domestic policy landscape and transforming banking worldwide Trillions of dollars flow across borders through the banking system every day While bank to bank transfers facilitate trade and investment they also provide opportunities for criminals and terrorists to move money around the globe To address this vulnerability large economies work together through an international standard setting body the FATF to shift laws and regulations on combating illicit financial flows Morse examines how this international organization has achieved such impact arguing that it relies on the power of unofficial market enforcement a process whereby market actors punish countries that fail to meet international standards The FATF produces a public noncomplier list which banks around the world use to shift resources and services away from listed countries As banks restrict cross border lending the domestic banking sector in listed countries advocates strongly for new laws and regulations ultimately leading to deep and significant compliance improvements The Bankers Blacklist offers lessons about the peril and power of globalized finance revealing new insights into how some of today s most pressing international cooperation challenges might be addressed
