Crassidis, John L. Junkins, 2011-10-26 Optimal Estimation of Dynamic Systems Second Edition highlights the importance of both physical and numerical modeling in solving dynamics based estimation problems found in engineering systems Accessible to engineering students applied mathematicians and practicing engineers the text presents the central concepts and methods of optimal estimation theory and applies the methods to problems with varying degrees of analytical and numerical difficulty Different approaches are often compared to show their absolute and relative utility The authors also offer prototype algorithms to stimulate the development and proper use of efficient computer programs MATLAB codes for the examples are available on the book s website New to the Second Edition With more than 100 pages of new material this reorganized edition expands upon the best selling original to include comprehensive developments and updates It incorporates new theoretical results an entirely new chapter on advanced sequential state estimation and additional examples and exercises An ideal self study guide for practicing engineers as well as senior undergraduate and beginning graduate students the book introduces the fundamentals of estimation and helps newcomers to understand the relationships between the estimation and modeling of dynamical systems It also illustrates the application of the theory to real world situations such as spacecraft attitude determination GPS navigation orbit determination and aircraft tracking *Educational Recommender Systems and Technologies: Practices and Challenges* Santos, Olga C., 2011-12-31 Recommender systems have shown to be successful in many domains where information overload exists This success has motivated research on how to deploy recommender systems in educational scenarios to facilitate access to a wide spectrum of information Tackling open issues in their deployment is gaining importance as lifelong learning becomes a necessity of the current knowledge based society Although Educational Recommender Systems ERS share the same key objectives as recommenders for e commerce applications there are some particularities that should be considered before directly applying existing solutions from those applications Educational Recommender Systems and Technologies Practices and Challenges aims to provide a comprehensive review of state of the art practices for ERS as well as the challenges to achieve their actual deployment Discussing such topics as the state of the art of ERS methodologies to develop ERS and architectures to support the recommendation process this book covers researchers interested in recommendation strategies for educational scenarios and in evaluating the impact of recommendations in learning as well as academics and practitioners in the area of technology enhanced learning **Extending Structures** Ana Agore, Gigel Militaru, 2019-08-29 Extending Structures Fundamentals and

Applications treats the extending structures ES problem in the context of groups Lie Leibniz algebras associative algebras and Poisson Jacobi algebras This concisely written monograph offers the reader an incursion into the extending structures problem which provides a common ground for studying both the extension problem and the factorization problem Features Provides a unified approach to the extension problem and the factorization problem Introduces the classifying complements problem as a sort of converse of the factorization problem and in the case of groups it leads to a theoretical formula for computing the number of types of isomorphisms of all groups of finite order that arise from a minimal set of data Describes a way of classifying a certain class of finite Lie Leibniz Poisson Jacobi associative algebras etc using flag structures Introduces new non abelian cohomological objects for all of the aforementioned categories As an application to the approach used for dealing with the classification part of the ES problem the Galois groups associated with extensions of Lie algebras and associative algebras are described Learning and Collaboration Technologies Panayiotis Zaphiris,Andri
