Change Pierson:

Changing Capitalisms? Glenn Morgan, Richard Whitley, Eli Moen, 2005-02-03 An increasing number of studies in the last decade or so have emphasized the viability and persistence of distinctive systems of economic coordination and control in developed market economies Over more or less the same period the revival of institutional economics and evolutionary approaches to understanding the firm has focused attention on how firms create distinctive capabilities through establishing routines that coordinate complementary activities and skills for particular strategic purposes For much of the 1990s these two strands of research remained distinct Those focusing on the institutional frameworks of market economies were primarily concerned with identifying complementarities between institutional arrangements that explained coherence and continuity On the other hand those focusing on the dynamics of firm behaviour studied how firms develop new capacities and are able to learn new ways of doing things This book aims to bring together these approaches It consists of a set of theoretically motivated and empirically informed chapters from a range of internationally known contributors to these debates In their chapters the authors show how institutions and firms evolve Ideas of path dependency and complementarity of institutions are subjected to critical scrutiny both by reference to their own internal logic and to empirical examples Varieties of institutional integration the surprising maintenance of deviant or alternative traditions and processes and the existence of unpredictable yet consequential policy options that can lead to breaks in path dependency are scrutinized with particular reference to how national and international firms may relate to institutions at various levels as a diverse arena of potential resources rather than as a singular and determinant constraining force The book provides a set of theoretical and empirical challenges for researchers concerned with the relationship between national institutional contexts and firm dynamics For those involved in teaching or studying at doctoral Masters and higher level undergraduate courses the book provides a structured entry into the debates about how institutions and firms are changing in the contemporary era

How and why Do Policies Change? Isabelle de Lovinfosse, 2008 How and why do policies change The author addresses this question by examining the renewable electricity policies of five European countries Belgium Denmark Germany the Netherlands and the UK over the last thirty years Employing a comparative approach that is qualitative yet consistent and rigorous she describes how these countries policies changed over time whether incrementally or comprehensively and shows how those changes may be explained citing political economic social and technological factors

Changing Labour Markets, Welfare Policies and Citizenship Goul Andersen, Jørgen, Jensen, Per H., 2002-01-23 Re addresses the question of how full citizenship may be preserved and developed in the face of enduring labour market pressures The book discusses possible ways in which the spill over effect from labour market marginality to loss of citizenship can be prevented

Changing Contours of Criminal Justice Mary Bosworth, Carolyn Hoyle, Lucia Zedner, 2016-11-03 Celebrating the 50th Anniversary of the Oxford Centre for Criminology this edited collection of essays seeks to explore the changing contours of

criminal justice over the past half century and to consider possible shifts over the next few decades The question of how social science disciplines develop and change does not invite any easy answer with the task made all the more difficult given the highly politicised nature of some subjects and the volatile evolving status of its institutions and practices A case in point is criminal justice at once fairly parochial much criminal justice scholarship is now global in its reach and subject areas that are now accepted as central to its study victims restorative justice security privatization terrorism citizenship and migration to name just a few were topics unknown to the discipline half a century ago Indeed most criminologists would have once stoutly denied that they had anything to do with it Likewise some central topics of past criminological attention like probation have largely receded from academic attention and some central criminal justice institutions like Borstal and corporal punishment have at least in Europe been abolished Although the rapidity and radical nature of this change make it quite impossible to predict what criminal justice will look like in fifty years time reflection on such developments may assist in understanding how it arrived at its current form and hint at what the future holds The contributors to this volume have been invited to reflect on the impact Oxford criminology has had on the discipline providing a unique and critical discussion about the current state of criminal justice around the world and the origins and future implications of contemporary practice All are leading internationally renowned criminologists whose work has defined and often re defined our understanding of criminal justice policy and literature *European and North American Policy Change* Giliberto Capano, Michael Howlett, 2009-12-16

The issue of policy dynamics is a key one in policy studies and one which is particularly amenable to comparative policy research This edited volume brings together some of the leading scholars in the field to examine the definition conceptualization and operationalization of policy change Drawing on empirical materials from a variety of longitudinal studies of Europe and North American policy development this book assesses some of the major existing and unresolved issues currently challenging the discipline It assesses existing approaches to understanding the multiplicity of drivers of policy change and provides a general map of the composite multidimensional world of policies in action The book features case studies on welfare reform education reform the World Bank tobacco control policy energy policy agricultural policy pension reform and the impact of public opinion Features of the volume include A focus on both the domestic and international drivers of policy change Contributions from internationally renowned political scientists and policy experts Extensive qualitative data on policy change covering a range of different topics and countries This book will be of interest to students and scholars of public policy public administration and public management and political science programmes worldwide **The Contested Diplomacy of the European External Action Service** Jost-Henrik

Morgenstern-Pomorski, 2018-03-09 The creation of the European External Action Service EEAS the EU's new diplomatic body was accompanied by high expectations for improving the way Europe would deal with foreign policy However observers of its first years of operation have come to the opposite conclusion This book explains why the EEAS despite being hailed as a

milestone in integration in Europe's foreign policy has fallen short of the mark. It does so by enlisting American institutionalist approaches to European questions of institutional creation, bureaucratic organisations and change. The book examines the peculiar shape the EEAS's organisation has taken, what political factors determined that shape and design and how it has operated. Finally, it looks at the autonomous operation of the EEAS from a bureaucratic theory perspective, concluding that this is the best way to understand its course. Including data gathered from elite interviews of politicians and senior officials involved in the institutional process, an assessment of official documentary evidence and a survey of EEAS officials at the organisation's beginning, it sheds new light on a controversial tool in the EU's foreign policy. This text will be of key interest to scholars and students of European Union foreign policy, public administration and more broadly to European Union and European politics as well as to practitioners within those fields. **Taxing Reforms** Richard

Eccleston, 2007-01-01. *Taxing Reforms* is a good short book about the comparative policies of Value Added Taxation (VAT) in Australia, Canada, Japan and the United States. *Taxing Reforms* is a fine book, well worth reading, especially for specialists in the comparative political economy of taxation; its richly detailed case studies will make it a fruitful source of comparative hypotheses. Isaac W. Martin, *Journal of Economic Literature*. **The Times They Are Changing?** Bent Greve, 2012-01-17. *The Times They Are Changing: Crisis and the Welfare State* presents a series of readings from international policy researchers that examine the effects of the recent financial crisis on welfare states around the world. Government Institutions: Effects, Changes and Normative Foundations Hendrik Wagenaar, 2012-12-06. Research on government institutions is one of the most exciting intellectual areas in political science and policy studies today. Increasingly, it is recognized by scholars in these fields that effective and legitimate policies depend on the design and maintenance of complex institutional arrangements. This book brings together some of the leading scholars in institutional research in The Netherlands. Their work addresses such perennially difficult questions in institutional research such as: How do we understand institutional change? How do we measure the effects of institutions on societal sectors and public policy? How do the normative foundations of government institutions influence their functioning? What are the principles of effective and legitimate institutional design? Through analysis of well-researched examples ranging from the fabled Dutch poldermodel through the transformation of the welfare state through privatizations of the Dutch telecommunications industry to the work of welfare officials, these authors demonstrate the interpenetration of normative, empirical and design issues in institutional theory. The book is intended for scholars and graduate students in political science, public policy, public administration and law. *Continuity and Change in the Welfare State* Anthony McCashin, 2018-10-04. This book offers an analysis of social security in Ireland from 1981 to 2016, a period of immense economic and social change during which social provisions such

as pensions and family benefits were downsized or diluted in many countries It considers whether this important area of welfare state provision in Ireland changed and the extent and pattern of change In the first in depth account of this aspect of social policy In Ireland the book sets the welfare state in a historical and comparative context and reviews the impact of globalisation politics and the financial crash on the scope and generosity of social security The book will be of particular interest to scholars of welfare state politics and comparative social policy as well as to students of Irish social policy

Neoliberalism as a State Project Asa Maron, Michael Shalev, 2017-04-14 This book explores the politics institutional dynamics and outcomes of neoliberal restructuring in Israel It puts forward a bold proposition that the very creation of a neoliberal political economy may be largely a state project Correspondingly it argues that key political conflicts surrounding the realization of this project may occur within the state Neoliberal restructuring and the institutionalization of permanent austerity are dependent on reconfigured power relations between state actors and are manifested in a new institutional architecture of the state This architecture in turn is the context in which efforts to change social and employment policies play themselves out The volume frames the coming of neoliberalism in Israel as a set of concrete and far reaching changes in the power and modes of operation of the key players in the political economy These changes undermined and neutralized veto players and enabled the ascendance of two state agencies the Ministry of Finance and the Central Bank which gained greatly augmented authority and autonomy These reconfigurations were set in motion by state initiatives that combined punctuated and incremental change The volume comprises case studies of changes in specific social and labor market policies revealing a close elective affinity between programmatic neoliberal changes on the one hand and on the other the proactive drive of the Ministry of Finance to enhance its control over public spending and policy design The book explores successful neoliberal reforms but also reforms that were blocked undermined or overturned by opposition emphasizing the importance of reformers capacity to translate temporary achievements into entrenched strategic advantages

Innovative Comparative Methods for Policy Analysis Benoit Rihoux, Heike Grimm, 2006-03-20 *Innovative Comparative Methods for Policy Analysis* aims to provide a decisive push to the further development and application of innovative and specific comparative methods for the improvement of policy analysis To take on this challenge this volume brings together methodologists and specialists from a broad range of social scientific disciplines and policy fields The work further develops methods for systematic comparative cases analysis in a small N research design with a key emphasis laid on policy oriented applications *Innovative Comparative Methods for Policy Analysis* is clearly both a social scientific and policy driven endeavor on the one hand the book engages in an effort to further improve social scientific methods but on the other hand this effort also intends to provide useful applied tools for policy analysts and the policy community alike Though quite a variety of methods and techniques are touched upon in this volume its focus is mainly laid on two recently developed research methods techniques which enable researchers to systematically compare a limited number of cases Qualitative Comparative Analysis QCA and

Swenden, 2010-01-04 Federalism has experienced a remarkable renaissance in recent decades as an alternative way to accommodate ethnic differences as a tool to combat remote undemocratic and ineffective central governments and lastly as a means to promote economic performance in the developing world through decentralisation This book seeks to bring different aspects and perspectives of federalism studies closer together by providing an analytical framework which transcends the sub fields and encourages contributors to look beyond the comfort zones of their own disciplinary approaches to the topic The authors seek to achieve this aim by structuring the contributions around four dimensions federalism studies the development and design of federal institutions federalism and democratic participation representation and accountability federalism and the accommodation of territorially based ethnic cultural and linguistic differences federalism and public policy With a strong comparative framework *New Directions in Federalism Studies* will be of interest to students and scholars of Federalism Government Regionalism and Multi level Governance It will also offer insights of relevance to Comparative Politics Public Policy Public Administration Nationalism and West European Politics **The Politics of Policy**

De literatuur over welvaartsstaten richt zich vaak op beleidsveranderingsprocessen en de mechanismen die deze veranderingen veroorzaken of tegenwerken De werkelijke verandering wordt vaak geïnterpreteerd als gevolg van externe crises of als gevolg van de meer geleidelijke beleidsveranderingsprocessen Dit boek heeft een ander uitgangspunt de auteurs onderzoeken de bewering dat de sociale en economische veranderingen als gevolg van de overgang naar een postindustriële samenleving de sociale fundamenteën van de verzorgingsstaat hebben verzwakt
