Changing Ideas In Modern Architecture 1750 195:

Changing Ideals in Modern Architecture, 1750-1950 Peter Collins, 1998-07-14 Collins explains what Revivalism Rationalism Eclecticism and Functionalism meant to those who practised them examining the impact that social forces and the other arts and sciences had on architectural styles while recognizing the tectonic continuities that underlie the seeming ruptures between pre modern modern and post modern approaches to design His work is infused with a deep sympathy for the classical spirit of the eighteenth century and he argued rigorously and passionately that Enlightenment ideas could be of real value to the architects of his generation particularly since technology had made it possible to use them effectively Collins's plea for sensitivity to tradition and the urban fabric while encouraging technological innovation and unprecedented programs makes his thought just as vital today as it was ahead of its time when first published Collins had long wished to see an affordable fully illustrated edition of his book and McGill Queen's University Press and the McGill School of Architecture are proud to at long last fulfil this wish The new edition includes a biographical sketch of Collins a brief publication history of the work and an introductory essay by Kenneth Frampton that discusses the importance of the work at the time it was first published and highlights its relevance for the architectural problems of today Like the classic works of Hitchcock Giedion Pevsner and Benevolo *Changing Ideals in Modern Architecture* is essential reading and forms a striking contrast with other works on modernism such as Reyner Banham's *It will be pertinent to all those interested in architectural history and theory modern history history of ideas and aesthetics*

Changing Ideas on Architecture in the Encyclopédie, 1750-1776

Kevin Harrington, 1985 *Changing Ideals in Modern Architecture, 1750-1950* Peter Collins, 1967 Frank Lloyd Wright and Le Corbusier Richard A. Etlin, 1994 Architectural historian Etlin defines the main principles of progressive 19th century architectural thought the architectural system the picturesque philosophical eclecticism and the spirit of the times These principles are explored in detail in relation to 19th and 20th century architecture and also to demonstrate their importance to the work of Wright and Le Corbusier Illustrated with drawings and photos Distributed by St Martin's Press Annotation copyrighted by Book News Inc Portland OR *The Baroque in Architectural Culture, 1880-1980* Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural

historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture

Making Place Stephan Feuchtwang, 2012-09-10 To make a place is to create a location where its creators can feel they belong Processes of place making are still very much ongoing today Geographers sociologists political scientists and philosophers of advanced capitalism have said that place is a localisation of the global However the creation of a place is not legible from such grand perspectives It is also much more creative than can be predicted by translating large scale processes into local cultures Anthropologists have been sensitive to the intimate tragic and lyrical senses of local place But their theorising has been too much bound up with cosmology and insufficiently with the intermediate scales of state and local state In this book Stephan Feuchtwang and his contributors offer a set of historical anthropological and scale mediated studies from China a country that includes a subcontinental variety of cultures and landscapes In the twentieth century it experienced collapse in civil war and was then reasserted as a particularly strong state Now it is managing the fastest growing capitalist economy in the world These intriguing Chinese studies contribute to the anthropology of place and space providing an historical perspective on processes of change and of accommodation to disruption The stories they tell are fascinating in their own right but in addition the result is a critical reformulation of previous theories of place that geographers philosophers historians and anthropologists will find of great interest

[A Reduced Photographic Reprint of the Edition of 1965.]. Peter COLLINS (of McGill University, Montreal.),1967 **Patterns of Plague** Lori Jones,2022-06-15 For centuries recurrent plague outbreaks took a grim toll on populations across Europe and Asia While medical interventions and treatments did not change significantly from the fourteenth century to the eighteenth century understandings of where and how plague originated did Through an innovative

reading of medical advice literature produced in England and France *Patterns of Plague* explores these changing perceptions across four centuries When plague appeared in the Mediterranean region in 1348 physicians believed the epidemic's timing and spread could be explained logically and the disease could be successfully treated This confidence resulted in the widespread and long term circulation of plague tracts which described the causes and signs of the disease offered advice for preventing infection and recommended therapies in a largely consistent style What where and especially who was blamed for plague outbreaks changed considerably however as political religious economic intellectual medical and even publication circumstances evolved *Patterns of Plague* sheds light on what was consistent about plague thinking and what was idiosyncratic to particular places and times revealing the many factors that influence how people understand and respond to epidemic disease

Imaginary Athens Jin-Sung Chun, 2020-11-25 This book comprehensively examines architecture urban planning and civic perception in three modern cities as they transform into national capitals through an entangled transnational process that involves an imaginative geography based on embellished memories of classical Athens Schinkel's classicist architecture in Berlin especially the principle of tectonics at its core came to be adopted effectively at faraway cities in East Asia merging with the notion of national polity as Imperial Japan sought to reinvent Tokyo and mutating into an inevitable reflection of modern civilization upon reaching colonial Seoul all of which give reason to ruminate over the phantasmagoria of modernity
