---

**Aristotle's classification system-** He classified organisms as either plants or animals. Animals were classified according to the presence or absence of red blood. They were further classified according to their habitat and morphology. Plants were classified by average size and structure as trees, herbs and shrubs.

**Carl Linnaeus binomial nomenclature-** Linnaeus' method of naming organisms called binomial nomenclature, gives each species a scientific name with two parts.

**Taxonomy-** the branch of science concerned with classification, especially of organisms

**What are the four rules to writing a scientific name?**

The first letter of the genus name always is capitalized, but the rest of the genus name and all letters of the species epithet are lowercase- If a scientific name is written in a printed book or magazine, it would be italicized- When a scientific name is written by hand, both parts of the name should be underlined- After the scientific name has been written completely, the genus name will be abbreviated to the first letter in later appearances.

**List and define the taxonomic categories**

**Domain-** contains kingdom

**Kingdom-** contains phylum

**Phylum-** contains class

**Class-** contains order

**Order-** contains families

**Family-** contains genus

**Genus-** contains species

**Species-** a group of organisms that can interbreed with each other

**Taxa-** a named group of organisms.

**Cladistics-** taxonomic method that models evolutionary relationships based on shared derived characters and phylogenetic.

You're a Genius Kelly Trach, 2021-11-30 Do you feel like you're doing it all and it's still not enough Discover your shortcut to success in P.S. You're a Genius After a lifetime of overachieving aiming to be excellent at everything and three failed tech startups in Silicon Valley Kelly Trach was stirred by a simple question What if I just did what I'm good at Now a six figure business coach Kelly poses the same question to you What if you just did what you're good at Despite conventional wisdom the gifts and experience you need are already innate Having that it factor or special ingredient isn't as elusive as you may think P.S. You're a Genius takes you on a self reflective journey to find your own gifts especially when you don't feel gifted at all asking questions like How are your idols a reflection of your own genius What are you great at that nobody taught you how to do How is your darkest shadow your greatest gift What have you been unexpectedly criticized for Through these questions and more you'll uncover the ways you naturally excel relinquish the lie that you're not good enough and discover how to convincingly convey your value to anyone In the process you'll unlock the gumption to go after what you really want and ditch the mindset blocks holding you back because YOU have an inherent genius You just have to find it **The Secret of Our Success** Joseph Henrich, 2017-10-17 How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species On the one hand we struggle to survive on our own in the wild often failing to overcome even basic challenges like obtaining food building shelters or avoiding predators On the other hand human groups have produced ingenious technologies sophisticated languages and complex institutions that have permitted us to successfully expand into a vast range of diverse environments What has enabled us to dominate the globe more than any other species while remaining virtually helpless as lone individuals This book shows that the secret of our success lies not in our innate intelligence but in our collective brains on the ability of human groups to socially interconnect and learn from one another over generations Drawing insights from lost European explorers clever chimpanzees mobile hunter gatherers neuroscientific findings ancient bones and the human genome Joseph Henrich demonstrates how our collective brains have propelled our species genetic evolution and shaped our biology Our early capacities for learning from others produced many cultural innovations such as fire cooking water containers plant knowledge and projectile weapons which in turn drove the expansion of our brains and altered our physiology anatomy and psychology in crucial ways Later on some collective brains generated and recombined powerful concepts such as the lever wheel screw and writing while also creating the institutions that continue to alter our motivations and perceptions Henrich shows how our genetics and biology

are inextricably interwoven with cultural evolution and how culture gene interactions launched our species on an extraordinary evolutionary trajectory Tracking clues from our ancient past to the present The Secret of Our Success explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species immense success and the origins of human uniqueness      Student Study Guide for Biology [by] Campbell/Reece Martha R.
