a paradox where the continent that has rich mineral resources nearly a billion people and a land mass which includes the sizes of China USA India Western Europe Argentina together larger than the sum of these regions is in an unacceptable state of being an object of aid debt and loans despite the vast resources both known and yet to be explored Africa should have been a productive and innovation centre and not a charity and aid centre of the world where donorship has replaced African national ownership of not just Africa's resources but even worse Africa's own agency autonomy and independence to shape policy and direction to undertake African integrated national development by establishing a science engineering and technology based knowledge innovative learning and competent economy The chapters in this volume address the application of the innovation approach to a variety of problems in Africa Together they highlight the critical importance of the innovation systems approach in each of the issues the authors preferred to select and analyse In the African context the application of innovation goes beyond firms to the informal activities at grassroots level The boundaries and the range of actors and activities for innovation application are varied and not limited This variation is represented in this volume by the diverse issues that the authors dealt with in their research by applying as common the use and application of innovation

Minorities of India: Issues and Challenges Dr. Arun Kumar, Nikita Srivastava, 2024-05-23 India often hailed as a land of diversity is home to a rich tapestry of cultures, languages, religions, and ethnicities. Within this vibrant mosaic, minorities in India encompass a wide spectrum ranging from religious minorities to caste and sexual minorities, language minorities, and gender minorities. With such a diversified group of people living in the nation, it becomes important to understand and reflect on the obstacles faced by the minorities in India. Despite facing historical and contemporary challenges, these minority groups contribute significantly to India's cultural, social, and economic fabric, enriching the nation's pluralistic identity. Embracing diversity as strength and fostering a culture of empathy and understanding are integral to India's aspirations for a harmonious and inclusive society. This book is an attempt to understand the obstacles of minorities in India from a multidisciplinary perspective. With contributions from researchers around the country, we hope that this book will assist professionals, academicians, feminist psychologists, sociologists, and social workers worldwide.

Radical Transformation Kevin MacKay, 2018-02-06 Radical Transformation is a tour de force. Thomas Homer-Dixon, author of *The Upside of Down*, *Catastrophe Creativity*, and *The Renewal of Civilization*, tells a story about industrial civilization's impending collapse and about the possibilities of averting this fate. Human communities first emerged as egalitarian, democratic groups that existed in symbiotic relationship with their environments. Increasing complexity led to the emergence of oligarchy, in which societies became captive to the logic of domination, exploitation, and ecological destruction. The challenge facing us today is to build a movement that will radically transform civilization and once more align our evolutionary trajectory in the direction of democracy, equality, and ecological sustainability.
