Beyond the Systems Paradigm Luciano L'Abate, 2013-05-30 This monograph owes its origins to the decades old proposal by David Bakan 1968 about the duality of human experience He proposed that community and agency would be two necessary and sufficient constructs to classify and to encompass most human relationships This dichotomy has been found to be valid by a variety of contributions over the last half a century L'Abate 2009 L'Abate Cusinato Maino Colesso Scilletta 2010 Additionally the purpose of this book is to argue and assert that two important fields of psychology family and personality psychologies if not already dead are conceptually empirically and practically moribund They are being superseded respectively by perhaps more appropriate perhaps more specific and more likely verifiable concepts and constructs such as intimacy and identity The traditional family still conceived as composed by two parents and two children of different gender is responsible for only one fourth of all domiciles in USA Singles same sex couples and completely different family organization complete the remaining 100% Difficulties in defining what is personality require a change in perspective and advance toward a comprehensive theory of human relationships that can and should fulfill requirements necessary to achieve an undoubtedly grandiose and ambitious universal status

The Many Faces of Imitation in Language Learning Gisela E. Speidel, Keith E. Nelson, 2012-12-06 In this book we take a fresh look at imitation With the knowledge of some 20 years of research after Chomsky's initial critique of the behavioristic approach to language learning it is time to explore imitation once again How imitation is viewed in this book has changed greatly since the 1950s and can only be understood by reading the various contributions This reading reveals many faces many forms many causes and many functions of imitation cognitive social information processing learning and biological Some views are far removed from the notion that an imitation must occur immediately or that it must be a perfect copy of an adult sentence But the essence of the concept of imitation is retained Some of the child's language behavior originates as an imitation of a prior model The range of phenomena covered is broad and stimulating Imitation's role is discussed from infancy on through all stages of language learning Individual differences among children are examined in how much they use imitation and in what forms and to what purposes they use it The forms and functions of parent imitation of their child are considered Second language learning is studied alongside first language learning The juxtaposition of so many views and facets of imitation in this book will help us to study the commonalities as well as differences of various forms and functions of imitative language and will help us to discern the further dimensions along which we must begin to differentiate imitation

The Self in the Family Luciano L'Abate, 1997-01-07 In his acclaimed book *A Theory of Personality Development* Luciano L'Abate introduced a revolutionary theory of personality development and functioning that departed radically from traditional theories In place of hypothetical traits existing in an empirical vacuum Dr L'Abate offered an image of observable interpersonal competencies functioning within the basic contexts of home work leisure and the marketplace Central to his theory was a developmental model that posited the family as the primordial setting in which propensities are formed and behavior patterns set By defining personality in terms of the growth and interplay of interpersonal competencies the L'Abate theory provided an epistemologically and empirically sound basis for understanding personality function and dysfunction as corollaries and extensions of one another In *The Self in the Family* Luciano L'Abate and Margaret Baggett again break new ground by expanding the L'Abate theory of personality development to encompass criminal and psychopathological behavior Drawing upon mounting empirical evidence that the family paradigm is the major determinant of personality socialization throughout the life span the authors develop a selfhood model with demonstrable links between the three domains of personality function criminality and psychopathology With the help of the model they show how it is now possible to arrive at a personality based interpretation of most deviant behaviors including criminality psychopathology addictions and even psychosomatic illnesses and they describe various preventive and psychotherapeutic applications for this expanded theory of family based personality development The authors further elaborate on the theories developed in Dr L'Abate's previous books by introducing the core concepts of hurt the basic feeling underlying much of personality functioning and dysfunctioning and a continuum of likeness the fundamental determinant of interpersonal choices and behavior in friendships parent child relations and marital relations Offering an empirically rigorous developmentally based unified field theory of personality function criminality and psychopathology *The Self in the Family* is essential reading for developmental and clinical psychologists family therapists personality theorists and criminality and psychopathology researchers
