Challenging The Injustice Of Poverty Agendas For Inclusive Development In South Asia:

Challenging the Injustice of Poverty Rehman Sobhan,2010 **Challenging the Injustice of Poverty** Rehman Sobhan,2010-10-04 This book explores issues related to poverty in South Asia in a two pronged manner by focusing on injustice created and perpetuated by the unjust nature of a social order as its source and by providing concrete suggestions about how policymakers may move to challenge these injustices Drawing on research inputs from studies across various South Asian countries the book redefines poverty as a process which excludes certain segments of the society from equitable participation in development opportunities as well as decision making It further identifies a variety of operational ideas which can be used by policymakers political activists and civil society advocacy groups committed to build a more just inclusive and poverty free society in South Asia **The Political Economy of Education in South Asia** John Richards,Manzoor Ahmed,Shahidul Islam,2021-12-17 With the exception of Sri Lanka South Asian countries have not achieved quality basic education an essential measure for escaping poverty inequality and social exclusion In The Political Economy of Education in South Asia John Richards Manzoor Ahmed and Shahidul Islam emphasize the importance of a dynamic system for education policy The Political Economy of Education in South Asia documents the weak core competency reading and math outcomes in government primary schools in India Pakistan Bangladesh and Nepal and the consequent rapid growth of non government schools over the last two decades It compares the training hiring and management of teachers in South Asian schools to successful national systems ranging from Singapore to Finland Discussing reform options it makes the case public good and public priorities are better served when both public and non government providers come under a strong public policy and accountability framework The Political Economy of Education in South Asia draws on the authors broad engagement in education research and practice in South Asia as well as analysis by prominent professors of education and NGO leaders to place basic education in a broad context and make the case that universal literacy and numeracy are necessary foundations for economic growth Poverty and Governance in South Asia Syeda Naushin Parnini,2014-11-20 Across South Asia in the last two decades there has been widespread emphasis on governance reforms aiming to reduce poverty through Millennium Development Goals MDGs The recent development agenda has had great impact over the region and this book finds that it largely widens the gap between the rich and poor which combined with rising inflation contributes to political instability The book analyses the discourses of development agenda and governance crisis and provides a survey of the region by not only focusing on India Pakistan and Bangladesh but also on the smaller countries in the region such as Bhutan Explaining three components of the development agenda as criteria for economic development poverty reduction governance reforms and civil society participation through liberal democracy this book explores the consequences of the neo liberal democracy and recent development agenda coupled with governance reforms This work argues that the political economy of South Asia is largely derived from experiences of historical colonialism and recent changes driven by contemporary rise of India as a global power

after the triumph of new liberal democracy and market capitalism in the post cold war era It proposes a strengthening of the instruments of endogenous governance and people s participation in South Asian countries to reduce poverty through MDGs and other development goals in combination with top down and bottom up approaches Offering an understanding of governance and development in the context of the South Asia this book will be of interest to academics in the fields of Political Economics International Development Studies Political Science and Governance Studies as well as policy makers

Quest for Inclusive Growth in Bangladesh Muhammed Muqtada,2020-11-22 This book offers a selection of intensely researched essays focused on the critical planning objectives and policy priorities that would enhance the promotion of inclusive growth in a developing country It has taken Bangladesh as the case study It argues for rethinking of traditional policies and provides arguments and ways to reorient these toward inclusive growth and better social inclusion These involve a dedicated focus on employment and inclusion in the design of monetary and fiscal policies trade and industrial policies policies toward rural non farm employment social protection and safety net strategy and the nature of institutional and governance reforms which are imperative for ensuring inclusive growth The studies included in the book were prepared before or at the onset of the ongoing COVID 19 pandemic and the unfolding economic crisis yet they provide cursory observations on its likely impact and underscore how the stated principles and policies of an inclusive growth strategy have become even more significant in the present situation Bangladesh has been growing respectably during the past decade and a half and has arguably shown strong progress in several social indicators However inequality and vulnerability are rising alarmingly and the economy is beset with high levels of corruption as well as with various other governance deficits that can adversely affect future growth and social inclusion The book provides a critical assessment of how far growth in Bangladesh has been inclusive both over time and in comparison to selected South and Southeast Asian countries It constructs a specific inclusive growth index with reference to what the study considers as the significant goals and pillars of inclusive growth Bangladesh is not the only developing country that is faced with the arduous task of tackling unbalanced economic growth and of implementing the 2030 Agenda Rising vulnerability inequality disappointing job growth and poor governance are also major challenges to inclusive growth for many countries in the Global South Therefore the appeal of this book extends well beyond the borders of Bangladesh and the South Asian region Corresponding to SDG 8 the book is aimed at academia researchers policymakers civil society leaders as well as other national and international development practitioners with an avid interest in issues concerning growth with equity and in sync with the 2030 Agenda for Sustainable Development In addition the book is a valuable resource for interested students of disciplines related to economics and development policy
