Theresa Cheung, 2017-03-14 Aristotle said you are what you repeatedly do Most of us have no idea that what we repeatedly do creates our lives we think our future is shaped by big events the decisions we make the thoughts we have but this book will show you that it is your daily actions that are the key Over the last few decades neuroscientists and psychologists have discovered that there is more power in I do than I think However if an action is repeated enough times it becomes habit but habits lack thought consideration and presence To effect long lasting meaningful change our actions need to be filled with a sense of personal meaning and power they need to be ritualized Creating personal ritual in our lives allows us to bring the presence of the sacred into the everyday The rituals in this book have been designed as symbolic acts providing a framework for anyone to use to create positive change in their lives The 7 morning rituals are designed to help you wake with determination the 7 afternoon rituals focus on living on purpose and the 7 evening rituals are about retiring with satisfaction

*Change Your Life's Direction* Jim Taylor, PhD, 2021-05-07 Jim Taylor explores how to harness the four forces that can control our life inertia and propel our lives in the direction of our OWN choosing values self esteem ownership and emotions Many people think of inertia as an object at rest will stay at rest unless a force is exerted on it like a boulder in a field And people can think of their lives in the same way static and unmoving But we aren t stuck in one place as so many express

when they are dissatisfied with their lives Rather our lives are moving swiftly and inexorably along a path driven by powerful forces both past and present that is highly resistant to a change in direction As a result small forces such as a modest insight or a brief aha moment aren't enough to catalyze significant change in how we think what we feel or how we act on or react to our world In fact meaningful change can only occur when forces are applied that are greater than the forces that are already propelling our lives Seeing our lives from this dynamic perspective is the foundation for understanding what it takes to bring meaningful and long lasting positive change to our lives Jim Taylor explores the four forces values self esteem ownership and emotions that propel our life inertia which shows itself through the lens with which we view the world the emotional reactions we have the actions that we take and the relationships that we create He then explains how to harness those to our own benefit so that we may steer our lives in the direction of our own choosing rather than allowing our past inertia or outside forces to dictate the direction our lives take By letting our values guide us building our self esteem taking ownership of our decisions and actions and using our emotions as positive fuel we can break free from our past inertia take control of our lives and chart a future of meaning happiness success and connection with confidence commitment and courage
