No Impact Man Colin Beavan, 2009-09-01 Bill McKibben meets Bill Bryson in this seriously engaging look at one man's decision to put his money where his mouth is and go off the grid for one year while still living in New York City to see if it's possible to make no net impact on the environment In No Impact Man a guilty liberal finally snaps swears off plastic goes organic becomes a bicycle nut turns off his power and generally becomes a tree hugging lunatic who tries to save the polar bears and the rest of the planet from environmental catastrophe while dragging his baby daughter and Prada wearing Four Seasons loving wife along for the ride And that's just the beginning In other words no trash no toxins in the water no elevators no subway no products in packaging no air conditioning no television What would it be like to try to live a no impact lifestyle Is it possible Could it catch on Is living this way more satisfying or less satisfying Harder or easier Is it worthwhile or senseless Are we all doomed or can our culture reduce the barriers to sustainable living so it becomes as easy as falling off a log These are the questions at the heart of this whole mad endeavor via which Colin Beavan hopes to explain to the rest of us how we can realistically live a more eco effective and by turns more content life in an age of inconvenient truths

The Decarbonization Imperative Michael Lenox, Rebecca Duff, 2021-10-19 Time is of the essence Climate change looms as a malignant force that will reshape our economy and society for generations to come If we are going to avoid the worst effects of climate change we are going to need to effectively decarbonize the global economy by 2050 This doesn't mean a modest or even a drastic improvement in fuel efficiency standards for automobiles It means 100 percent of the cars on the road being battery powered or powered by some other non carbon emitting powertrain It means 100 percent of our global electricity needs being met by renewables and other non carbon emitting sources such as nuclear power It means electrifying the global industrials sector and replacing carbon intensive chemical processes with green alternatives eliminating scope one emissions emissions in production across all industries particularly steel cement petrochemicals which are the backbone of the global economy It means sustainable farming while still feeding a growing global population Responding to the existential threat of climate change Michael Lenox and Rebecca Duff propose a radical reconfiguration of the industries contributing the most and most harmfully to this planetary crisis Disruptive innovation and a particular calibration of industry dynamics will be key to this change The authors analyze precisely what this might look like for specific

sectors of the world economy ranging from agriculture to industrials and building energy and transportation and examine the possible challenges and obstacles to introducing a paradigm shift in each one With regards to existent business practices and products how much and what kind of transformation can be achieved The authors assert that markets are critical to achieving the needed change and that they operate within a larger scale of institutional rules and norms Lenox and Duff conclude with an analysis of policy interventions and strategies that could move us toward clean tech and decarbonization by 2050

The Complete Idiot's Guide to Saving the Environment Greg Pahl, 2000-12-01 Discusses the three main global threats decline in biodiversity the thinning of the ozone layer and global warming and offers ways to reduce reuse and recycle
