Crime Scene

Processing Laboratory Manual and Workbook Donald A. Hayden, 2004-09-01 Crime Scene Processing Laboratory Manual and Workbook serves as the laboratory course complement to Ross Gardner's Practical Crime Scene Processing and Investigation. Developed through Hayden's own course on crime scene investigation, it is designed to teach the basics of crime scene documentation as well as evidence identification, preservation, and collection. Standing on its own, the workbook is also useful for self-instruction and as seminar curriculum. This multi-purpose manual contains fifty exercises, including practical hands-on experiments such as evidence packaging, in addition to workbook exercises. Advice on report writing and suggestions for research papers are also provided. The manual includes a variety of documentary exercises not found in other resources, such as mapping a crime scene, developing a crime scene response kit, preparing an evidence voucher, and sketching a crime scene. With a variety of exercises simulating actual tasks, this laboratory manual helps build the skills required to properly document and process a crime scene. When the exercises are complete, it becomes a useful reference that can be revisited and relied upon throughout a career.

**Forensic Science** Jay A. Siegel, Kathy Mirakovits, 2006-09-07 Forensic Science: The Basics explains every aspect of crime scene investigation, moving from basic areas of criminalistics and beyond to pathology, anthropology, and engineering. It also explores new and emerging areas such as forensic entomology. With no previous knowledge of either science or law required, information is self-contained and conveyed at the lowest possible non-scientific level, making this text suitable for both lower-level academic adoptions as well as for a general audience. It also offers a complete package of ancillary material for instructors. Comprehensive and Up to Date: Covers DNA, drugs, firearms, fingerprints, and trace evidence. Includes cutting-edge material on spectroscopy, chromatography, microscopy, odontology, and entomology. Demonstrates the practical application of modern chemistry, biology, and other laboratory sciences. Each chapter opens with learning objectives, a chapter outline, and an introduction; closes with a summary and review questions for self-testing. Contains real-life examples, many from the author's own experience. Build an exceptional classroom experience with this dynamic resource. More than 200 full-color nongraphic illustrations. Countless figures, tables, and charts. A wealth of supporting material, including lecture slides and test questions, available on [www.classwire.com](http://www.classwire.com). Real case studies to demonstrate forensic concepts in action. Suggested student projects to reinforce learning. Appropriate for High School and University Students. Written in the lucid and concise style of a master teacher. Fully explains the scientific basics required. Omits potentially traumatic photographs and subject matter. About the Author: Eminently qualified to create this work, Jay Siegel is both a practicing forensic expert and a master instructor. He has worked for the Virginia Bureau of Forensic Sciences and published extensively in the field. He continues to be called upon as an expert witness, having testified over 200 times in state, federal, and military courts across the country. With nearly thirty years of teaching experience, he is highly active in curriculum development for forensic science classes taught at all levels, from junior high through graduate school. He is currently director of the Forensic and Investigative Sciences Program at Purdue University in Indiana. In February of

2009 Mr Siegel received the Distinguished Fellow award from the American Academy of Forensic Sciences at its annual meeting This is the highest honor that the Academy bestows upon a fellow In addition George Washington University has selected Mr Siegel for the 2008 2009 Distinguished Alumni Scholar This award the highest that the University bestows upon its alumni is designated for those who have made truly outstanding contributions to the knowledge base of their disciplines For Instructors Only Develop and Customize Your Curriculum Draw from hundreds of PowerPoint slides and illustrations to supplement your lectures Organize your class with Dr Siegel s helpful outlines and learning objectives Review answers to end of chapter questions Build exams for different levels from a giant test bank of problems This book also works in conjunction with Forensic Science Laboratory Manual and Workbook Revised Edition All ancillary material will be available in convenient website format at [www.classwire.com](http://www.classwire.com) Upon request photographs lecture slides and a test bank are also available to instructors on CD
