Understanding Spectrum Liberalisation Martin Sims,Toby Youell,Richard Womersley,2015-08-26 Until the 1990s almost all spectrum licenses were given away practically for free even the first mobile licenses which laid the foundation for multi billion dollar companies that dominate stock markets around the world In the past fifteen years there has been a concerted attempt to liberalise the sector and make it more open to market forces Th

Purely Formal Legal Theory Ottavio Quirico,2025-04-16 This book elaborates on deontic logic and network theory to present a reductionist theory of the law disclosing a simple understanding of legal norms based on minimum necessary and sufficient notions The analysis explores the concept of a norm as a claim obligation relation that regulates conduct that is action and inaction among subjects in space and time Based on these five minimum notions the study illustrates legal systems as networks of substantive right duty relations that are procedurally organised according to time The research relies on basic Kripke style semantics as social matrixes to explain fundamental normative concepts and further on network science social network theory and graph theoretic notation based on ties and nodes to elaborate a formal representation of minimum necessary notions and of legal systems as deontic networks The book will be of interest to academics researchers and practitioners working in the areas of legal philosophy legal theory and international law
