Composition Movements Come Aesthetics Avant Garde:

The Idea of the Avant Garde Marc James Léger, 2019-10-15 The concept of the avant garde is highly contested whether one consigns it to history or claims it for present day or future uses The first volume of *The Idea of the Avant Garde And What It Means Today* provided a lively forum on the kinds of radical art theory and partisan practices that are possible in today's world of global art markets and creative industry entrepreneurialism This second volume presents the work of another 50 artists and writers exploring the diverse ways that avant gardism develops reflexive and experimental combinations of aesthetic and political praxis The manifest strategies temporalities and genealogies of avant garde art and politics are expressed through an international intergenerational and interdisciplinary convocation of ideas that covers the fields of film video architecture visual art art activism literature poetry theatre performance intermedia and music *The European Avant-Garde - A Hundred Years Later*, 2024-01-08 The title of this book *The European Avant Garde A Hundred Years Later* implies the European avant garde took place a century ago that it is a thing of the past However it does not aim to consolidate this position but to question it It addresses temporality as the central dimension related to the notion of the avant garde The book brings forth original revisions of the theories of the avant garde the works of the avant garde the idea of the avant garde as being the vanguard the leading force of change It addresses the returning of the avant garde during the twentieth century and today *Imaginary Power, Real Horizons* Richard Gilman-Opalsky, 2024-07-09 A defense of the radical imagination from a scholar of social movements Political theorist and philosopher Richard Gilman Opalsky's *Imaginary Power Real Horizons* is a tribute to the imagination and to its necessity for liberatory struggle Impractical is the name given to anyone who imagines something radically other than what exists he writes However many things such as the abolition of slavery were dismissed as impractical before they came to be In a warm plainspoken manner these essays chart the affects of creativity and utopianism through topics as varied as the cyclical nature of popular movements the international history of May Day the experience of teaching political theory and Marxism in contemporary China and the revolutionary aspirations of Free Jazz The human imagination is a real world creating power and those who would declare otherwise have a poor understanding of history *Imaginary Power Real Horizons* is a call to action for those who would dare to dream of a society organized by a different logic than capitalism **Precarious objects** Ilaria Vanni, 2020-12-01 *Precarious objects* explores the traffic between design and activism by telling stories drawn from contemporary counter precarity cases in Italy As a category of labour and of global social experience in general precarity is a wicked problem that affects all aspects of life regulating the production and circulation of a wide range of material and immaterial effects In this book three microhistories of counter precarity explore existent forms of resistance and resilience to precarity Drawing on ethnographies and archives and bringing together debates from design theory cultural studies and geography this study shows how design objects and practices recode political communication and reorient how things are imagined produced and circulated It also

shows how design as a practice can reconfigure material conditions and prefigure ways to repair some of the effects of precarity on everyday life

Politics of the Many Benjamin Halligan, Alexei Penzin, Stefano Pippa, Rebecca Carson, 2021-09-09 *Politics of the Many* draws inspiration from Percy Bysshe Shelley's celebrated call to arms 'Ye are many they are few'. This idea of the Many as a general form of emancipatory subjectivity that cannot be erased for the sake of the One is the philosophical and political assumption shared by contributors to this book. They raise questions of collective agency and its crisis in contemporary capitalism via new engagements with Marxist philosophy, psychoanalysis, theories of social reproduction and value form and post-colonial critiques and drawing on activist thought and strategies. This book interrogates both established and emergent formations of the Many: the people, classes, publics, crowds, masses, multitudes, tracing their genealogies, their recent failures and victories and their potentials to change the world. The book proposes and explores an intense and provoking series of new or reinvented concepts, figures and theoretical constellations including: dividuality, the centaur, unintentional vanguard, insomnia at work, always on, capitalism, multitude from its voiding to a non-emergence, crowds, necropolitics and the link between political subjectivity and value form. The contributors to *Politics of the Many* are both acclaimed and emergent thinkers including Carina Brand, Rebecca Carson, Luhuna Carvalho, Lorenzo Chiesa, Jodi Dean, Dario Gentili, Benjamin Halligan, Marc James Leger, Paul Mazzocchi, Alexei Penzin, Stefano Pippa, Gerald Raunig and Stephen Shukaitis

Mass Intellectuality and Democratic Leadership in Higher Education Joss Winn, Richard Hall, 2017-08-24 Higher education in the UK is in crisis. The idea of the public university is under assault and both the future of the sector and its relationship to society are being gambled. Higher education is increasingly unaffordable; its historic institutions are becoming untenable and their purpose is resolutely instrumental. What and who have led us to this crisis? What are the alternatives? To whom do we look for leadership in revealing those alternatives? This book critically analyses intellectual leadership in the university, exploring ongoing efforts from around the world to create alternative models for organizing higher education and the production of knowledge. Its authors offer their experience and views from inside and beyond the structures of mainstream higher education in order to reflect on efforts to create alternatives. In the process, the volume asks: is it possible to reimagine the university democratically and cooperatively? If so, what are the implications for leadership not just within the university but also in terms of higher education's relationship to society? The authors argue that mass higher education is at the point where it no longer reflects the needs, capacities and long-term interests of global society. An alternative role and purpose is required based upon mass intellectuality or the real possibility of democracy in learning and the production of knowledge

Anarchisms, Postanarchisms and Ethics Benjamin Franks, 2019-11-05 What are the core features of an anarchist ethics? Why do some anarchisms identify themselves as anti-moral or amoral? And what are the practical outcomes of ethical analysis for anarchist and post-anarchist practice? This book shows how we can identify and evaluate different forms of anarchism through their ethical principles and we can identify these ethics in the evolving

anarchist organizations tactics and forms of critique The book outlines the various key anarchist positions explaining how the identification of their ethical positions provides a substantive basis to classify rival traditions of thought It describes the different ideological structures of anarchism in terms of their conceptual organization integrated into their main material practices highlighting that there is no singular anarchism It goes on to assess distinctive approaches for identifying and categorizing anarchism and argues that it is best viewed not as a movement that prioritizes rights and liberal accounts of autonomy or that prescribes specific revolutionary goals but as a way to challenge hierarchies of power in the generation of social goods Finally the book uses case studies from contemporary issues in educational practice and pertinent political conflicts to demonstrate the practical applicability of a virtue approaches to anarchism *Commoning with George*

Caffentzis and Silvia Federici Camille Barbagallo, Nicholas Beuret, David Harvie, 2019-06-20 This collection explores key themes in the contemporary critique of political economy in honour of the work and practice of Silvia Federici and George Caffentzis two of the most significant contemporary theorists of capitalism and anti capitalism whose contributions span half a century of struggle crisis and debate Drawing together a collection of essays that assess Federici and Caffentzis s contributions offering critical and comradely reflections and commentary that build on their scholarship this volume acts as a guide to their work while also taking us beyond it The book is organised around five key themes revolutionary histories reproduction money and value commons and struggles Ultimately the book shines light on the continuing relevance of Caffentzis and Federici s work in the twenty first century for understanding anti capitalism primitive accumulation and the commons feminism reproductive labour and Marx s value theory **The Coloniality of Asylum** Fiorenza

Picozza, 2021-02-11 Through the concepts of the coloniality of asylum and solidarity as method this book links the question of the state to the one of civil society in so doing it questions the idea of autonomous politics showing how both refugee mobility and solidarity are intimately marked by the coloniality of asylum in its multiple ramifications of objectification racialisation and victimisation Taking an interdisciplinary approach *The Coloniality of Asylum* bridges border studies with decolonial theory and the anthropology of the state and accounts for the mutual production of refugees and Europe It shows how Europe politically legally and socially produces refugees while in turn through their border struggles and autonomous movements refugees produce the space of Europe Drawing on ethnographic fieldwork conducted in Hamburg in the wake of the 2015 long summer of migration the book offers a polyphonic account moving between the standpoints of different subjects and wrestling with questions of protection freedom autonomy solidarity and subjectivity *The Routledge*

Companion to Urban Imaginaries Christoph Lindner, Miriam Meissner, 2018-09-28 *The Routledge Companion to Urban Imaginaries* delves into examples of urban imaginaries across multiple media and geographies from new visions of smart eco and resilient cities to urban dystopias in popular culture from architectural renderings of starchitecture and luxury living to performative activism for new spatial justice and from speculative experiments in urban planning fiction and photography to

augmented urban realities in crowd mapping and mobile apps The volume brings various global perspectives together and into close dialogue to offer a broad interdisciplinary and critical overview of the current state of research on urban imaginaries Questioning the politics of urban imagination the companion gives particular attention to the role that urban imaginaries play in shaping the future of urban societies communities and built environments Throughout the companion issues of power resistance and uneven geographical development remain central Adopting a transnational perspective the volume challenges research on urban imaginaries from the perspective of globalization and postcolonial studies inviting critical reconsiderations of urbanism in its diverse current forms and definitions In the process the companion explores issues of Western centrism in urban research and design and accommodates current attempts to radically rethink urban form and experience This is an essential resource for scholars and graduate researchers in the fields of urban planning and architecture art media and cultural studies film visual and literary studies sociology and political science geography and anthropology

Posthuman Urbanism Debra Benita Shaw, 2017-10-24 The World Health Organisation estimates that by 2030 six out of every ten people in the world will live in a city But what does it mean to inhabit the city in the twenty first century Posthuman Urbanism evaluates the relevance and usefulness of posthuman theory to understanding the urban subject and its conditions of possibility It argues that contemporary science and technology is radically changing the way that we understand our bodies and that understanding ourselves as posthuman offers new insights into urban inequalities By analysing the relationship between the biological sciences and cities from the nineteenth century onward as it is expressed in architecture popular culture and case studies of contemporary insurgent practices a case is made for posthuman urbanism as a significant concept for changing the meaning of urban space It answers the question of how we can change ourselves to change the way we live with others both human and non human in a rapidly urbanising world

Who Runs the Artworld Brad Buckley, John Conomos, 2017-09-01 Who Runs the Artworld Money Power and Ethics examines the economics and mythologies of today's global artworld It unmaskes the complex web of relationships that now exist among high profile curators collectors museum trustees and corporate sponsors and the historic and ongoing complicity between the art and money markets The book examines alternative models being deployed by curators and artists influenced by the 2008 global financial crisis and the international socio political Occupy movement with a particular focus on a renewed activism by artists This activism is coupled with an institutional and social critique led by groups such as Liberate Tate the Precarious Workers Brigade and Strike Debt Who Runs the Artworld Money Power and Ethics brings together a diverse range of thinkers who draw on the disciplines of art theory social sciences and cultural economics and curatorship and the lived experience of artists The contributors to this book are in their respective contexts working at the forefront of these compelling issues

Art and Postcapitalism Dave Beech, 2019-10-20 Artistic labour was exemplary for Utopian Socialist theories of attractive labour and Marxist theories of nonalienated labour but the rise of the anti work movement and current theories of fully

automated luxury communism have seen art topple from its privileged place within the left's political imaginary as the artist has been reconceived as a prototype of the precarious 24/7 worker. Art and Postcapitalism argues that art remains essential for thinking about the intersection of labour, capitalism and postcapitalism not insofar as it merges work and pleasure but as an example of noncapitalist production. Reassessing the contemporary politics of work by revisiting debates about art, technology and in the nineteenth and twentieth century, Dave Beech challenges the aesthetics of labour in John Ruskin, William Morris and Oscar Wilde with a value theory of the supersession of capitalism that sheds light on the anti-work theory by Silvia Federici, Andre Gorz, Kathi Weeks and Maurizio Lazzarato as well as the technological Cockayne of Srnicek and Williams and Paul Mason. Formulating a critique of contemporary postcapitalism and developing a new understanding of art and labour within the political project of the supersession of value production, this book is essential for activists, scholars and anyone interested in the real and imagined escape routes from capitalism. *The Urban Enigma* Simone Vegliò, 2020-07-15

This book explores how Latin America indicated an autonomous form of postcolonialism that was marked by the production of multiple conceptualisations of time. The analysis particularly focuses on iconic urban transformations in capital cities such as Buenos Aires, Mexico City and Brasilia diachronically and investigates each case's specific representations of past, present and future. By exploring these three episodes, the book shows how Latin America's postcolonialism involved specific spatial dynamics that were inherently working over global socio-political geographies resulting from the legacy of a long colonial imagination. The text is divided into two parts. The first part discusses some theoretical questions concerning the very conceptualization of Latin American space and the importance of exploring a genealogy of its urban geographies. The second part analyses the themes proposed through the discussion of the materiality of specific historical examples. The section delves into urban transformations in the aforementioned capital cities and focuses on how iconic material forms are able to encapsulate the main socio-political features defining each country's post-colonial project. The book aims to depict a historical geography capable of describing how controversial relations between power and knowledge had materialised in the shapes of the urban environment and had iconically contributed to the multifaceted production of the global area known as Latin America. Without any pretension to offer an all-embracing perspective, the book discusses the Latin America experience within the broader question concerning the genealogy of global socio-political geographies. **The Liberal Arts and**

Management Education Stefano Harney, Howard Thomas, 2020-01-30. Calling for the transformation of undergraduate education, Thomas and Harney argue that the liberal arts should be integrated into the traditional management curriculum to blend technical and analytic acumen with creativity, critical thinking and ethical intelligence. In describing their vision for a new liberal management education, the authors demonstrate how a holistic pedagogy that does not sacrifice one wealth of learning for another instead encourages participation and integration to the benefit of students and society. Globally, in sweep, the book provides case studies of successfully implemented experimental courses in Asia and Britain as well as a speculative

chapter on how an African liberal management education could take shape based on African centred principles and histories Finally the book argues that the stakes of this agenda go beyond mere curricular reform and pedagogical innovation and speak directly to the environmental business political and social challenges we face today *The Sociology of Debt* Mark Featherstone,2020-12-16 Over the course of the last ten years the issue of debt has become a serious problem that threatens to destroy the global socio economic system and ruin the everyday lives of millions of people This collection brings together a range of perspectives of key thinkers on debt to provide a sociological analysis focused upon the social political economic and cultural meanings of indebtedness The contributors to the book consider both the lived experience of debt and the more abstract processes of financialisation taking place globally Showing how debt functions on the level of both macro and microeconomics the book also provides a more holistic perspective with accounts that span sociological cultural and economic forms of analysis **Creative Justice** Mark Banks,2017-01-30 Creative Justice examines issues of inequality and injustice in the cultural industries and cultural workplace It first aims to do justice to the kinds of objects and texts produced by artists musicians designersand other kinds of symbol makers by appreciating them as meaningful goods with objective qualities It also shows how cultural work itself has objective quality as a rewarding and socially engaging practice and not just a means to an economic end But this book is also about injustice made evident in the workings of arts education and cultural policy and through the inequities and degradations of cultural work In worlds where low pay and wage inequality are endemic and where access to the best cultural academies jobs and positions is becoming more strongly determined by social background what chance do ordinary people have of obtaining their own creative justice Aimed at students and scholars across a range of disciplines including Sociology Media and Communication Cultural Studies Critical Management Studies and Human Geography Creative Justice examines the evidence for and proposes some solutions to the problem of obtaining fairer and more equalitarian systems of arts and cultural work **Walking Networks** Blake Morris,2019-11-05 Since the early 2000s there has been an increase in artists who are walking as an essential part of their artistic practice This book identifies the unique attributes of walking to develop a definition for walking as an artistic medium Drawing on historical sources such as the walks of the Romantic poets Dadaists and Letterist Situationist Internationals it presents a practice based approach to walking focused on the radical memory of the medium The book covers three contemporary organisations working to develop the artistic medium of walking London s Walking Artists Network Scotland s Walking Institute and New York City s Walk Exchange and looks at how these different organisation s strategies contribute to the development of the artistic medium of walking The book is framed by five walking exercises and invites the reader to create a memory palace for the medium of walking as a practical exploration of artistic walking practices Art Activism for an Anticolonial Future Carlos Garrido Castellano,2021-10-01 Analyzing the confluence between coloniality and activist art Art Activism for an Anticolonial Future argues that there is much to gain from approaching contemporary politically committed art practices

from the angle of anticolonial postcolonial and decolonial struggles These struggles inspired a vast yet underexplored set of ideas about art and cultural practices and did so decades before the acceptance of radical artistic practices by mainstream art institutions Carlos Garrido Castellano argues that art activism has been confined to a limited spatial and temporal framework that of Western culture and the modernist avant garde Assumptions about the individual creator and the belated arrival of derivative avant garde aesthetics to the periphery have generated a narrow view of political art at the expense of our capacity to perceive a truly global alternative praxis Garrido Castellano then illuminates such a praxis focusing attention on socially engaged art from the Global South challenging the supposed universality of Western artistic norms and demonstrating the role of art in promoting and configuring a collective critical consciousness in postcolonial public spheres This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/7166>

DIY Cultures and Underground Music Scenes Andy Bennett, Paula Guerra, 2018-12-07 This volume examines the global influence and impact of DIY cultural practice as this informs the production performance and consumption of underground music in different parts of the world The book brings together a series of original studies of DIY musical activities in Europe North and South America Asia and Oceania The chapters combine insights from established academic writers with the work of younger scholars some of whom are directly engaged in contemporary underground music scenes The book begins by revisiting and re evaluating key themes and issues that have been used in studying the cultural meaning of alternative and underground music scenes notably aspects of space place and identity and the political economy of DIY cultural practice The book then explores how the DIY cultural practices that characterize alternative and underground music scenes have been impacted and influenced by technological change notably the emergence of digital media Finally in acknowledging the over 40 year history of DIY cultural practice in punk and post punk contexts the book considers how DIY cultures have become embedded in cultural memory and the emotional geographies of place Through combining high quality data and fresh conceptual insights in the context of an international body of work spanning the disciplines of popular music studies cultural and media studies and sociology the book offers a series of innovative new directions in the study of DIY cultures and underground alternative music scenes This volume will be of particular interest to undergraduate students in the above mentioned fields of study as well as an invaluable resource for established academics and researchers working in these and related fields
