Books in Series ,1985 Vols for 1980 issued in three parts Series Authors and Titles **Composition methods in homotopy groups of spheres** Hiroshi Toda,1962 The description for this book Composition Methods in Homotopy Groups of Spheres AM 49 Volume 49 will be forthcoming Composition Methods in Homotopy Groups of Spheres Hiroshi Toda,1962

Stable Homotopy Groups of Spheres Stanley O. Kochman,2006-11-14 A central problem in algebraic topology is the calculation of the values of the stable homotopy groups of spheres S In this book a new method for this is developed based upon the analysis of the Atiyah Hirzebruch spectral sequence After the tools for this analysis are developed these methods are applied to compute inductively the first 64 stable stems a substantial improvement over the previously known 45 Much of this computation is algorithmic and is done by computer As an application an element of degree 62 of Kervaire invariant one is shown to have order two This book will be useful to algebraic topologists and graduate students with a knowledge of basic homotopy theory and Brown Peterson homology for its methods as a reference on the structure of the first 64 stable stems and for the tables depicting the behavior of the Atiyah Hirzebruch and classical Adams spectral sequences through degree 64

Composition Methods in Homotopy Groups of Spheres, By Hiroshi Toda Hiroshi Toda,1962 Complex Cobordism and Stable Homotopy Groups of Spheres Douglas C. Ravenel,2003 Since the publication of its first edition this book has served as one of the few available on the classical Adams spectral sequence and is the best account on the Adams Novikov spectral sequence This new edition has been updated in many places especially the final chapter which has been completely rewritten with an eye toward future research in the field It remains the definitive reference on the stable homotopy groups of spheres The first three chapters introduce the homotopy groups of spheres and take the reader from the classical results in the field though the computational aspects **Complex Cobordism and Stable Homotopy Groups of Spheres** Douglas C. Ravenel,2023-02-09 Since the publication of its first edition this book has served as one of the few available on the classical Adams spectral sequence and is the best account on the Adams Novikov spectral sequence This new edition has been updated in many places especially the final chapter which has been completely rewritten with an eye toward future research in the field It remains the definitive reference on the stable homotopy groups of spheres The first three chapters introduce the homotopy groups of spheres and take the reader from the classical results in the field though the computational aspects of the classical Adams spectral sequence and its modifications which are the main tools topologists have to investigate the homotopy groups of spheres Nowadays the most efficient tools are the Brown Peterson theory the Adams Novikov spectral sequence and the chromatic spectral sequence a device for analyzing the global structure of the stable homotopy groups of spheres and relating them to the cohomology of the Morava stabilizer groups These topics are described in detail in Chapters 4 to 6 The revamped Chapter 7 is the computational payoff of the book yielding a lot of information about the stable homotopy group of spheres Appendices follow giving self contained accounts of the theory of

formal group laws and the homological algebra associated with Hopf algebras and Hopf algebroids The book is intended for anyone wishing to study computational stable homotopy theory It is accessible to graduate students with a knowledge of algebraic topology and recommended to anyone wishing to venture into the frontiers of the subject Stable Homotopy Groups of Spheres Stanley O. Kochman, 2014-01-15 *Composition Methods in Homotopy Groups of Spheres* Hiroshi Toda, 1962 *Computation of the Stable Homotopy Groups of Spheres* Linan Zhong, Hao Zhao, Wenhui Shen, 2014-08-25

This book concerns a central problem in algebraic topology stable homotopy groups of spheres Ever since J P Serre's historic result showed that the homotopy groups of spheres are finitely generated in 1950s the determination of homotopy groups of spheres has always been the focus of algebraic topologists Up to now still much has not been known to us In our book we consider the stable part of the homotopy groups of spheres We will mainly apply two computation tools to detect nontrivial elements of the stable homotopy groups of spheres Adams spectral sequence and May spectral sequence One part of this book is dedicated to obtaining some nontrivial product elements via the Adams spectral sequence The remaining part is dedicated to approaching one important problem raised by M Hovey the convergence of a certain product in the Adams spectral sequence The importance of this problem is its being related to the existence of a large series of secondary periodic elements of the stable homotopy groups of spheres **Composition Methods in Homotopy Groups of Spheres** Hiroshi Toda, 1962 **Groups of Homotopy Spheres, I** M. A. Kervaire, John W. Milnor, 2023-07-18 In and Around Stable Homotopy Groups of Spheres Zhouli Xu, 2017

My thesis focuses on computations of stable homotopy groups of spheres with applications and connections to differential geometry and motivic homotopy theory The Adams spectral sequences and Toda brackets play a major role in my work We have introduced two methods to compute Adams differentials and solve extension problems one is very technical but inductive using the algebraic Kahn-Priddy theorem the other one is more systematic using a new connection between motivic homotopy theory and chromatic homotopy theory Combining both methods we have computed stable stems into a larger range As a consequence I solved the strong Kervaire invariant problem in dimension 62 and showed that the 61 sphere has a unique smooth structure which is the last odd dimensional case
