Comprehensive Functional Verification The Complete Industry Cycle Systems On Silicon:

Comprehensive Functional Verification Bruce Wile, John Goss, Wolfgang Roesner, 2005-05-26 A key strength of this book is that it describes the entire verification cycle and details each stage The organization of the book follows the cycle demonstrating how functional verification engages all aspects of the overall design effort and how individual cycle stages relate to the larger design process Throughout the text the authors leverage their 35 plus years experience in functional verification providing examples and case studies and focusing on the skills methods and tools needed to complete each verification task Additionally the major vendors Mentor Graphics Cadence Design Systems Verisity and Synopsys have implemented key examples from the text and made these available on line so that the reader can test out the methods described in the text

Comprehensive Functional Verification Bruce Wile, John Goss, Wolfgang Roesner, 2005-05-26 One of the biggest challenges in chip and system design is determining whether the hardware works correctly That is the job of functional verification engineers and they are the audience for this comprehensive text from three top industry professionals As designs increase in complexity so has the value of verification engineers within the hardware design team In fact the need for skilled verification engineers has grown dramatically functional verification now consumes between 40 and 70% of a project s labor and about half its cost Currently there are very few books on verification for engineers and none that cover the subject as comprehensively as this text A key strength of this book is that it describes the entire verification cycle and details each stage The organization of the book follows the cycle demonstrating how functional verification engages all aspects of the overall design effort and how individual cycle stages relate to the larger design process Throughout the text the authors leverage their 35 plus years experience in functional verification providing examples and case studies and focusing on the skills methods and tools needed to complete each verification task Comprehensive overview of the complete verification cycle Combines industry experience with a strong emphasis on functional verification fundamentals Includes real world case studies

Applied Computational Intelligence and Mathematical Methods Radek Silhavy, Petr Silhavy, Zdenka Prokopova, 2017-09-04 The book discusses real world problems and exploratory research in computational intelligence and mathematical models It brings new approaches and methods to real world problems and exploratory research that describes novel approaches in the mathematical methods computational intelligence methods and software engineering in the scope of the intelligent systems This book constitutes the refereed proceedings of the Computational Methods in Systems and Software 2017 a conference that provided an international forum for the discussion of the latest high quality research results in all areas related to computational methods statistics cybernetics and software engineering

Algorithmic Learning Theory Yoav Freund, László Györfi, György Turán, Thomas Zeugmann, 2008-10-02 This volume contains papers presented at the 19th International Conference on Algorithmic Learning Theory ALT 2008 which was held in Budapest Hungary during October 13 16 2008 The conference was co located with the 11th International Conference on Discovery Science, DS 2008 The

technical program of ALT 2008 contained 31 papers selected from 46 submissions and 5 invited talks The invited talks were presented in joint sessions of both conferences ALT 2008 was the 19th in the ALT conference series established in Japan in 1990 The series Analogical and Inductive Inference is a predecessor of this series it was held in 1986 1989 and 1992 co located with ALT in 1994 and subsequently merged with ALT ALT maintains its strong connections to Japan but has also been held in other countries such as Australia Germany Italy Singapore Spain and the USA The ALT conference series is supervised by its Steering Committee Naoki Abe IBM T J

Post-Silicon and Runtime Verification for Modern Processors Ilya Wagner, Valeria Bertacco, 2010-11-25 The purpose of this book is to survey the state of the art and evolving directions in post silicon and runtime verification The authors start by giving an overview of the state of the art in verification particularly current post silicon methodologies in use in the industry both for the domain of processor pipeline design and for memory subsystems They then dive into the presentation of several new post silicon verification solutions aimed at boosting the verification coverage of modern processors dedicating several chapters to this topic The presentation of runtime verification solutions follows a similar approach This is an area of processor design that is still in its early stages of exploration and that holds the promise of accomplishing the ultimate goal of achieving complete correctness guarantees for microprocessor based computation The authors conclude the book with a look towards the future of late stage verification and its growing role in the processor life cycle
