

Instructions

- a. Assume the St. Cloud plant uses a single plantwide overhead rate to assign *all* overhead (plantwide and department) costs to jobs. Use expected total direct labor hours to compute the overhead rate. What is the expected cost per unit produced for job no. 110?
- b. Recalculate the projected manufacturing costs for job no. 110 using three separate rates: one rate for plantwide overhead and two separate department overhead rates, all based on machine-hours.
- c. The sales policy at the St. Cloud plant dictates that job bids be calculated by adding 40 percent to total manufacturing costs. What would be the bid for job no. 110 using (1) the overhead rate from part a and (2) the overhead rate from part b? Explain why the bids differ. Which of the overhead allocation methods would you recommend and why?
- d. Using the allocation rates in part b, compute the under- or overapplied overhead for the St. Cloud plant for the year. Explain the impact on net income of assigning the under- or overapplied overhead to cost of goods sold rather than prorating the amount between inventories and cost of goods sold.
- e. A St. Cloud subcontractor has offered to produce the parts for job no. 110 for a price of \$12 per unit. Assume the St. Cloud sales force has already committed to the bid price based on the calculations in part b. Should the St. Cloud plant buy the \$12 per unit part from the subcontractor or continue to make the parts for job no. 110 itself?
- f. Would your response to part e change if the St. Cloud plant could use the facilities necessary to produce parts for job no. 110 for another job that could earn an incremental profit of \$20,000?
- g. If the subcontractor mentioned in part e is located in Mexico, what additional international environmental issues, other than price, will management at the St. Cloud plant need to evaluate?
- h. If Gilster Company management decides to undertake a target costing approach to pricing its jobs, what types of changes will it need to make for such an approach to be successful?

Comprehensive Problem 5 The Gilster Company Solution

RC Schank

A decorative graphic element consisting of a light blue horizontal bar with a rounded right end, and a red circular shape partially visible behind it.
