Compressed Air Operations Manual:

Compressed Air Operations Manual Brian Elliott, 2010-05-31 Compressed air systems are the third most important utility to industry and are commonly the most misunderstood. Written to appeal to operators, mechanics, and junior engineers, this manual is designed to provide a solid understanding of common compression systems and operations techniques. Using this book, the users learn tips and techniques for creating a baseline of system performance, determining the impact of different compressors and compressor control types for the job at hand, and learning basic approaches to general maintenance.

Manuals Combined: U.S. Navy Diving Manual Revision 7 (1 December 2016); A Navy Diving Supervisor's Guide for Safe and Productive Diving Operations; and Guidance For Diving In Contaminated Waters, Over 1 000 total pages.

INTRODUCTION

1 1 1 Purpose This chapter provides a general history of the development of military diving operations.

1 1 2 Scope This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our predecessors and not repeat mistakes of the past.

1 1 3 Role of the U S Navy The U S Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue, and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations; wartime salvage and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.
