been accepted for presentation from over 640 submissions in the second International Conference on Advanced Computing Networking and Informatics 2014 held in Kolkata India during June 24-26, 2014. The first volume includes innovative computing techniques and relevant research results in informatics with selective applications in pattern recognition, signal image processing and HCI. The second volume on the other hand demonstrates the possible scope of the computing techniques and informatics in wireless communications, networking and security.

Software Engineering Fundamentals Alind Saxena, 2021-03-31. The aim of this book is to refresh you from software engineering fundamental concepts basic day to day. Definitions, Terminologies, Development Models, Encompassing Specifications, Function Oriented Modelling, Object Oriented Modelling, Dynamic Modelling, Analysis, Design, Coding, Testing, Implementation, Metrics, PERT Charts, Gantt Charts, Project Management, Software Configuration Management, Software Maintenance, Software Quality Assurance etc. You will utilize it during the period of learning and even after that. It will give the glimpse of array of questions and answers. It will induce the capacity and capability and confidence in you to do real life applications. It is hoped that you will drink the water not for you only but will provide to others. A job teaches us to obey while expertise and perfection are the result of our own efforts. Do practice with software paradigms: Structured Programming, Modular Programming, Objects Oriented Programming etc. and measure the same to become Software Engineer.

Three volumes cover a variety of topics which include medical imaging networks, data mining, intelligent computing, software design, image processing, mobile computing, digital signals and speech processing, video surveillance and processing, web mining, wireless sensor networks, circuit analysis, fuzzy systems, antenna and communication systems, biomedical signal processing and applications, cloud computing, embedded systems applications and cyber security and digital forensic. The readers of these volumes will be highly benefited from the technical contents of the topics.

Preaching Contextually Anuparthi John Prabhakar, 2016-10-06. Preaching is the commission given by the great preacher Jesus Christ. It is urgent because it communicates the essential gospel meant for the salvation of the perishing humanity. God is universal and people are local. The universal God became local in Jesus Christ through his incarnation. The saving gospel of Jesus Christ is necessary to communicate contextually. The majority of Indian Christians come from Dalit background. The ongoing development of Dalit Theology is helping to make the gospel relevant and effective. But the homiletic methodology being adapted in the Indian context is mostly from the West. In this scenario Preaching Contextually searches for relevant methodology for Indian Dalits. For this purpose contents of some sample sermons were analyzed homiletically to assess its relevance and to present a feasible method as a Dalit Homiletic. Prof. Dr. J. Lio C. zar Adam Brazil. This is a book which contributes enormously to homiletic research and science not only in the Indian context but also for other contexts mainly those permeated by social ills and injustices. It is a necessary book for those who study and do homiletics mainly in the context of vulnerability.
