## Sound Waves

Sound is all around us. We can hear a bird in a tree, your Mom shouting upstairs, "Hurry up - we're late!" and we can listen to our favorite songs and music.

There are all different types of sounds but they have one thing in common... They all travel to your ear as sound waves.

### Creating the Wave

Sound waves are vibrations (like ripples) that move the air, in the same way that the wind moves the water in the sea to make waves. The waves travel towards your ear as the air particles move the next air particles until they arrive at your ear.

How do the waves know how to get to your ear? Well, the answer is, they don't. The sound waves travel in lots of different directions from where the sound is made and your ear catches the bit that comes in your direction. Once your ear has 'caught' the sound, it carries on vibrating the tiny bones inside your ear which turn the vibrations into electric pulses that are sent to the brain.
