SAMPLE Control Objective Company codes employed in the system should be set to productive Control Description In case of post go live actions there are some configurations that must be turned on to replicate that the SAP system is active for use and to protect the data that has been transferred to the production system In a normal SAP recommends the functioning company codes should be marked as productive as soon as the implementation happens This configuration specifies and endorses the active status of the company code and by default would limit the unsanctioned changes comprising data deletion in the production server Risk Here the risk is mistaken deletion of master transactional data which will unfavorably influence the system reliability Test Steps Here

we check the global company code configuration to confirm if the appropriate company codes are marked as Productive For This Follow Step15 1 1 We can see that Company code B100 is not Productive as such to make it productive follow the steps in 15 1 2

Auditing and GRC Automation in SAP Maxim Chuprunov,2013-04-09 Over the last few years financial statement scandals cases of fraud and corruption data protection violations and other legal violations have led to numerous liability cases damages claims and losses of reputation As a reaction to these developments several regulations have been issued Corporate Governance the Sarbanes Oxley Act IFRS Basel II and III Solvency II and BilMoG to name just a few In this book compliance is understood as the process mapped not only in an internal control system that is intended to guarantee conformity with legal requirements but also with internal policies and enterprise objectives in particular efficiency and profitability The current literature primarily confines itself to mapping controls in SAP ERP and auditing SAP systems Maxim Chuprunov not only addresses this subject but extends the aim of internal controls from legal compliance to include efficiency and profitability and then well beyond because a basic understanding of the processes involved in IT supported compliance management processes are not delivered along with the software Starting with the requirements for compliance Part I he not only answers compliance relevant questions in the form of an audit guide for an SAP ERP system and in the form of risks and control descriptions Part II but also shows how to automate the compliance management process based on SAP GRC Part III He thus addresses the current need for solutions for implementing an integrated GRC system in an organization especially focusing on the continuous control monitoring topics Maxim Chuprunov mainly targets compliance experts auditors SAP project managers and consultants responsible for GRC products as readers for his book They will find indispensable information for their daily work from the first to the last page In addition MBA management information system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment on GRC in general and its implementation in particular
