Computability and Logic George S. Boolos, 1987 *Computability and Logic* George S. Boolos, 2007 This fifth edition of *Computability and Logic* covers not just the staple topics of an intermediate logic course such as Gödel's incompleteness theorems but also optional topics that include Turing's theory of computability and Ramsey's theorem **Computability and Logic** Richard C. JEFFREY, 1994 Computability and Logic George Boolos, Richard C. Jeffrey, 1980 Now in its fourth edition this book on logic has been enhanced and rewritten Copyright Libri GmbH All rights reserved **Computability, Complexity, Logic** E. Börger, 1989-07-01 The theme of this book is formed by a pair of concepts the concept of formal language as carrier of the precise expression of meaning facts and problems and the concept of algorithm or calculus i.e. a formally operating procedure for the solution of precisely described questions and problems The book is a unified introduction to the modern theory of these concepts to the way in which they developed first in mathematical logic and computability theory and later in automata theory and to the theory of formal languages and complexity theory Apart from considering the fundamental themes and classical aspects of these areas the subject matter has been selected to give priority throughout to the new aspects of traditional questions results and methods which have developed from the needs or knowledge of computer science and particularly of complexity theory It is both a textbook for introductory courses in the above mentioned disciplines as well as a monograph in which further results of new research are systematically presented and where an attempt is made to make explicit the connections and analogies between a variety of concepts and constructions **Computability** Richard L. Epstein, Walter A. Carnielli, 2018-10-24 Now in a new edition the classic presentation of the theory of computable functions in the context of the foundations of mathematics Part I motivates the study of computability with discussions and readings about the crisis in the foundations of mathematics in the early 20th century while presenting the basic ideas of whole number function proof and real number Part II starts with readings from Turing and Post leading to the formal theory of recursive functions Part III presents sufficient formal logic to give a full development of Gödel's incompleteness theorems Part IV considers the significance of the technical work with a discussion of Church's Thesis and readings on the foundations of mathematics This new edition contains the timeline *Computability and Undecidability* as well as the essay *On mathematics* Mathematical Logic and Computability H. International Congress of Logic Methodology and Philosophy of Science was held at the University of Western Ontario London Canada 27 August to 2 September 1975 The Congress was held under the auspices of the International Union of History and Philosophy of Science Division of Logic Methodology and Philosophy of Science and was sponsored by the National Research Council of Canada and the University of Western Ontario As those associated closely with the work of the Division over the years know well the work undertaken by its members varies greatly and spans a number of fields not always obviously related In addition the volume of work done by first rate scholars and scientists in the various fields of the Division has risen enormously For these and related reasons it seemed to the editors chosen by the Divisional officers that the usual format of publishing the proceedings of the Congress be abandoned in favour of a somewhat more flexible and hopefully acceptable method of presentation Accordingly the work of the invited participants to the Congress has been divided into four volumes appearing in the University of Western Ontario Series in Philosophy of Science The volumes are entitled Logic Foundations of Mathematics and Computability Theory Foundational Problems in the Special Sciences Basic Problems in Methodology and Linguistics and Historical and Philosophical Dimensions of Logic Methodology and Philosophy of Science
