Attributing Authorship Harold Love,2002-06-20 Recent literary scholarship has seen a shift of interest away from questions of attribution Yet these questions remain urgent and important for any historical study of writing and have been

given a powerful new impetus by advances in statistical studies of language and the coming on line of large databases of texts in machine searchable form The present book is the first comprehensive survey of the field from a literary perspective to appear for forty years It covers both traditional and computer based approaches to attribution and evaluates each in respect of their potentialities and limitations It revisits a number of famous controversies including those concerning the authorship of the Homeric poems books from the Old and New Testaments and the plays of Shakespeare Written with wit as well as erudition Attributing Authorship will make this intriguing field accessible for students and scholars alike No Innocent Deposits Richard J. Robillard,Ron Fortune,2015-06-12 This volume explores a dimension of authorship not given its due in the critical discourse to this point authorship contested Much of the existing critical literature begins with a text and the proposition that the text has an author The debates move from here to questions about who the author is whether or not the author s identity is even relevant and what relationship she or he does and does

not have to the text The authors contributing to this collection however ask about circumstances surrounding efforts to prevent authors from even being allowed to have these questions asked of them from even being identified as authors They ask about the political cultural economic and social circumstances that motivate a prospective audience to resist an author's efforts to have a text published read and discussed Particularly noteworthy is the range of everyday rhetorical situations in which contesting authorship occurs from the production of a corporate document to the publication of fan fiction Each chapter also focuses on particular instances in which authorship has been contested demonstrating how theories about various forms of contested authorship play out in a range of events from the complex issues surrounding peer review to authorship in the age of intelligent machines *Abducting Writing Studies* Sidney I Dobrin, Kyle Jensen, 2016-11-28 This collection is organized around the concept of abduction a logical operation introduced by Charles Sanders Peirce that explains how new ideas are formed in response to an uncertain future Responding to this uncertain future with rigor and insight each essay imagines new methods concepts and perspectives that extend writing studies research into startling new terrain To appeal to a wide range of audiences the essays work within foundational areas in rhetoric and composition research such as space time archive networks inscription and life Some of the essays take familiar concepts such as historiography the writing subject and tone and use abduction to chart new paths forward Others use abduction to identify areas within writing studies such as futural writing the calling of place and risk that require more sustained attention Taken together these essays expose the manifold pathways that writing studies research may pursue Each of the twelve essays that comprise this collection sparks new insights about the phenomenon of writing A must read for rhetoric and composition scholars and students *Abducting Writing Studies* is sure to foster vibrant discussions about what is possible in writing research and instruction *The Papers of the Bibliographical Society of America* Bibliographical Society of America, 1996

Tlaxcala Mexico Counting Paul Benjamin L. White, 2025-04-15 Who wrote the Pauline Epistles For nearly 1 700 years the answer seemed fairly straightforward The New Testament canon set the boundary at thirteen or fourteen including Hebrews Pauline Epistles alongside an uncontroversial biographical framework within which to imagine them in Acts In the early nineteenth century the identification of the historical Paul with the canonical Paul was severed when theologian Ferdinand Christian Baur of the University of Tübingen laid the groundwork for the fundamental historiographical moves that still orient Pauline Studies as a critical discipline by both delimiting the number of authentic Pauline Epistles and highlighting the tendentious character of Acts portrayal of Paul Given the highly uncertain and subjective nature of so much of the argumentation over the authenticity of the Pauline Epistles as it developed in the nineteenth century the analysis of authorial style took on increasing weight as a way out of so many special decisions The linguistic features of texts were counted averaged and compared In measuring one text against another the Pauline stylome emerged as the incontrovertible standard for uncovering canonical forgeries in the Apostle's name Tracing the long history of the computational approach to the Pauline authorship problem Counting Paul exposes the ideological foundations and questionable science of much of the work and argues that Pauline biography ought not be written from fewer sources than what the New Testament has given us but rather more It advocates for a more expansive vision of what might count as Pauline by reorienting our focus away from internal criteria like appeals to style and toward external criteria like the reception of Paul in the generations after his death
