Paradise Lost Alan Jacobs, 2025-05-27 The life and times of Milton s epic poem about Satan s revolt against God and humanity s expulsion from paradise John Milton s *Paradise Lost* has secured its place in the pantheon of epic poems but unlike almost all other works in the pantheon it is intimately associated with religious doctrine and its implications for how we live our lives For more than three centuries it has been a flashpoint for arguments not just about Christianity but also about governance rebellion and obedience sexual politics and what makes poetry great Alan Jacobs tells the story of Milton s enduring poem shedding light on its composition and reception and explaining why it resonates so powerfully with us today Composed through dictation after Milton went blind in 1652 *Paradise Lost* centers on an ancient biblical answer to the eternal question of how evil came into the world It has proved impossible to disentangle the defense or critique of the poem from attitudes toward Christianity itself Does Christian theology entail monarchy or democracy Are relations between the sexes thwarted by pompous and tyrannical men or by vain and disobedient women Jacobs traces how generations of readers have grappled with these and other questions along the way revealing how Milton s poem influenced novelists like Mary Shelley and Philip Pullman and has served as the inspiration for paintings operas comic books and video games An essential companion to Milton s poetic masterpiece this book shows why *Paradise Lost* continues to serve as a mirror reflecting our own complex attitudes about power and authority justice and revolt and sin and salvation

Cubism and Futurism R. Bruce Elder, 2018-06-30 Cubism and futurism were closely related movements that vied with each other in the economy of renown Perception dynamism and the dynamism of perception these were the issues that passed back and forth between the two Cubism and Futurism Spiritual Machines and the Cinematic Effect shows how movement became in the traditional visual arts a central factor with the advent of the cinema gone were the days when an artwork strived merely to lift experience out the realm of change and flow The cinema at this time was understood as an electric art akin to X rays coloured light and sonic energy In this book celebrated filmmaker and author Bruce Elder connects the dynamism that the cinema made an essential feature of the new artwork to the new science of electromagnetism Cubism is a movement on the cusp of the transition from the Cartesian world of standardized Cartesian coordinates and interchangeable machine parts to a Galvanic world of continuities and flows In contrast futurism

embraced completely the emerging electromagnetic view of reality Cubism and Futurism examines the similarity and differences between the two movements engagement with the new science of energy and shows that the notion of energy made central to the new artwork by the cinema assumed a spiritual dimension as the cinema itself came to be seen as a pneumatic machine
