The Internet: A Great Invention

INTRODUCTION

The Internet has changed the way we live. It started as something that we could access only through a computer, but nowadays it is everywhere, and I love it!

ONE THING I LIKE *find answers*

One of the cool things about the world wide web is that you can look up anything you want and find out the answer straight away. Isn't that fantastic? For example, imagine you are arguing with your friends about how to do something. Easy solution: go online and find the answer!

WHAT I LIKE BEST *learn stuff cheaply & RECOMMENDATION www.udemy.com*

However, the greatest thing about the Internet is how you can learn tons of things very cheaply or even for free! In fact, my favourite website is www.udemy.com, where people register to teach and learn about different things: music, website design, making apps, history, etc. So I totally recommend it to everyone!

CONCLUSION

In conclusion, the Internet has a lot of great things. For me, the best are finding information and learning online. What about you? What are your favourite things about it?

EFL Learners' Acquisition of the English Article System Mahmoud Hajjar, 2024-03-11 This book addresses several issues that have been controversial in the literature surrounding second language L2 acquisition including the role that the first language L1 plays in development the ability of L2 learners to acquire properties of functional categories not realised in their L1 the nature of L2 development itself and the extent to which such development is constrained by innate linguistic capacities universal grammar These issues are considered by investigating the acquisition of the English articles by speakers of an L1 that has an article system encoding definiteness Arabic and an L1 that lacks articles Japanese at different proficiency levels in English Those who will find this book useful include policy makers in language education as well as

Dirk Siepmann, 2020-11-29 *German and English Academic Usage and Academic Translation* focuses on academic and popular scientific academic usage This book's brief is both theoretical and practical on the theoretical side it aims to provide a systematic corpus based account of current academic usage in English and in German as well as of the translation problems associated with various academic genres on the practical side it seeks to equip academic translators with the skills required to produce target language text in accordance with disciplinary conventions The main perspective taken is that of a translator working from German into English but the converse direction is also regularly taken into account Most of the examples used are based on errors that occurred in real life translation jobs Additional practice materials and sample translations are available as eResources here www.routledge.com/9780367619022 This book will be an important resource for professionals aspiring to translate academic texts linguists interested in academic usage translation scholars and graduate and post graduate students **Article Emergence in Old English** Lotte Sommerer, 2018-05-22 This book

investigates nominal determination in Old English and the emergence of the definite and the indefinite article Analyzing Old English prose texts it discusses the nature of linguistic categorization and argues that a usage based cognitive constructionalist approach best explains when how and why the article category developed It is shown that the development of the OE demonstrative *se* that and the OE numeral *an* one should not be told as a story of two individual grammaticalizing morphemes but must be reconceptualized in constructional terms The emergence of the morphological category article follows from constructional changes in the linguistic networks of OE speakers and especially from grammatical constructionalization i.e. the emergence of a new schematic mostly procedural form meaning pairing which previously did not exist in the construction Next to other functional cognitive reasons the book especially highlights analogy and frequency effects as driving forces of linguistic change *English for IT Communication* Tony Myers, Jaime Buchanan, 2024-11-29
