Scientist And The Forger, The (Second Edition): Probing A Turbulent Art World Jehane Ragai, 2018-01-31 In The Scientist and the Forger Probing a Turbulent Art World the author draws upon an enthralling range of case studies from Botticelli to Leonardo Campendonk to Pollock and Chagall to Freud equipping the reader with a holistic understanding of an art world shaped by fast moving trends and increasingly permeated by science We are taken on a gripping journey becoming witness to the attempts currently being made to safeguard a partly complicit art market virtually under siege How can we determine whether it was Leonardo's hand that created Salvator Mundi How can we prove that a suspected Pollock is a forgery And how can Man in a Black Cravat be seemingly incontrovertibly attributed to Lucian Freud despite this artist's adamant refusal to recognize it as one of his own This book reveals how art historians and scientists collaborate conclusively to authenticate paintings or demonstrate that they are forgeries and as the enigma of La Bella Principessa continues to baffle the question remains do we have enough reason to hope that we shall one day know her true story Building on the first edition a more in depth look is taken at some of the greatest scandals to date with an interpretation of the psychological behavior of Ann Freedman the former president and director of the Knoedler Gallery

Porcelain Analysis and Its Role in the Forensic Attribution of Ceramic Specimens Howell G. M.

Edwards,2021-11-09 The material for this book arose from the author's research into porcelains over many years as a collector in appreciation of their artistic beauty as an analytical chemist in the scientific interrogation of their body paste enamel pigments and glaze compositions and as a ceramic historian in the assessment of their manufactory foundations and their correlation with available documentation relating to their recipes and formulations A discussion of the role of analysis in the framework of a holistic assessment of artworks and specifically the composition of porcelain namely hard paste soft paste phosphatic bone china and magnesian is followed by its growth from its beginnings in China to its importation into Europe in the 16th Century A survey of European porcelain manufactories in the 17th and 18th Centuries is followed by a description of the raw materials minerals and recipes for porcelain manufacture and details of the chemistry of the high temperature firing processes involved therein The historical backgrounds to several important European factories are considered highlighting the imperfections in the written record that have been perpetuated through the ages The analytical chemical information derived from the interrogation of specimens from fragments shards or perfect finished items is reviewed and operational protocols established for the identification of a factory output from the data presented Several case studies are examined in detail across several porcelain manufactories to indicate the role adopted by modern analytical science with information provided at the quantitative elemental oxide and qualitative molecular spectroscopic levels where applicable The attribution

of a specimen to a particular factory is either supported thereby or in some cases a potential reassessment of an earlier attribution is indicated Overall the information provided by analytical chemical data is seen to be extremely useful for porcelain identification and for its potential attribution in the context of a holistic forensic evaluation of hitherto unknown porcelain exemplars of questionable factory origins **A Forger's Tale**, 2015 *Global Dilemmas* Malcolm

Calne, 2021-10-04 This book is concerned with cheating in Science and the harm that it does concentrating on three disasters in cell culture which caused international concern and personal tragedy for the perpetrators There is an overview of plant animal and human cheating providing a background to the focus on Science This demands a special form of truth in that claims need to be substantiated by repetition in independent laboratories to confirm that the claims work The nature of originality is examined in art and Science An attempt has been made to determine the background and motives for cheating in Science in the certain knowledge that it will be unmasked leading to scandal Advice is given to the young Scientist and suggestions have been made as to how fraud in Science could be reduced by more regulated supervision There is a need to revise the regulations and assessment of claims of originality and the whole review process of journals to avoid publishing fake data This text is unusual in focusing on three well documented cases The data should not have been published in high impact journals if more rigorous review had been made Journals should require independent repetition of claims that seem to be too good to be true This little book should be of considerable interest to young scientists historians of science and editors

of scientific journals The general reader might find it fascinating to learn how science works or does not work

inside Leonardo da Vinci scholar Martin Kemp's lifelong passion for the genius who has helped define our culture. Each chapter considers a specific work as Kemp offers insight into his encounters with academics, collectors, curators, devious dealers, auctioneers, and authors, as well as how he has grappled with legions of Leonardo loonies, treasured vested interests in academia and museums, and fended off fusillades of non-Leonardos. Kemp explains his thinking on the Last Supper and the Mona Lisa, retells his part in the identification of the stolen Buccleuch Madonna, and explains his involvement on the two major Leonardo discoveries of the last 100 years: La Bella Principessa and Salvator Mundi. His engaging narrative elucidates the issues surrounding attribution, the scientific analyses that support experts' interpretations, and the continuing importance of connoisseurship. Illustrated with the works being discussed, *Living with Leonardo* explores the artist's genius from every angle, including technical analysis and the pop culture works he inspired, such as *The Da Vinci Code* and his enduring influence 500 years after his death.

Offerings to the Discerning Eye Sue D'Auria, 2010. Egyptologist Jack A. Josephson, a writer and researcher in the tradition of the gentleman scholar, has achieved broad recognition as an authority in Egyptian art history. His lucid, investigative analyses have probed and redefined the limits of inquiry, expanded research parameters, and broadened perspectives, emphasizing the undeniable contributions of art history in an interdisciplinary framework. This volume of collected essays is dedicated to Josephson by distinguished friends and colleagues, a select roster including eminent established scholars in the field of Egyptology and rising stars of the younger generation. Josephson views Egyptian art history as a critical but neglected area of study and is a strong proponent of its reinstatement in the academic curriculum as an essential component in the formation of new cadres. The quality of the articles in this Egyptological medley is a tribute to the honoree and an affirmation

of the esteem of his peers while the range of subjects and variety of themes addressed reflect the degree to which he has in his own scholarship undertaken to implement his ideal
