Formalized Probability Theory And Applications Using Theorem Proving:

Formalized Probability Theory and Applications Using Theorem Proving Hasan, Osman, Tahar, Sofiène, 2015-03-31 Scientists and engineers often have to deal with systems that exhibit random or unpredictable elements and must effectively evaluate probabilities in each situation. Computer simulations while the traditional tool used to solve such problems are limited in the scale and complexity of the problems they can solve. Formalized Probability Theory and Applications Using Theorem Proving discusses some of the limitations inherent in computer systems when applied to problems of probabilistic analysis and presents a novel solution to these limitations combining higher order logic with computer based theorem proving. Combining practical application with theoretical discussion, this book is an important reference tool for mathematicians, scientists, engineers, and researchers in all STEM fields. *Formalized Probability Theory and Applications Using Theorem Proving* Osman Hasan, Sofiène Tahar, 2015. This book discusses some of the limitations inherent in computer systems when applied to problems of probabilistic analysis and presents a novel solution to these limitations combining higher order logic with computer based theorem proving.

FM 2009: Formal Methods Ana Cavalcanti, Dennis Dams, 2009-11-04. The 16th International Symposium on Formal Methods marked the 10th anniversary of the First World Congress on Formal Methods that was held in Toulouse, France. We wished to celebrate this by advertising and organizing FM 2009 as the Second World Congress in the FM series, aiming to once again bring together the formal methods communities from all over the world. The statistics displayed in the table on the next page include the number of countries represented by the Programme Committee members, as well as of the authors of submitted and accepted papers. Novel this year was a special track on tools and industrial applications. Submissions of papers on these topics were especially encouraged.

but not given any special treatment It was just as hard to get a special track paper accepted as any other paper What we did promote however was a discussion of how originality contribution and soundness should be judged for these papers The following questions were used by our Programme Committee

Interactive Theorem Proving Matt Kaufmann, Lawrence C. Paulson, 2010-06-30 This volume contains the papers presented at ITP 2010 the First International Conference on Interactive Theorem Proving It was held during July 11-14 2010 in Edinburgh Scotland as part of the Federated Logic Conference FLoC July 9-21 2010 alongside the other FLoC conferences and workshops ITP combines the communities of two venerable meetings the TPHOLs conference and the ACL2 workshop The former conference originated in 1988 as a workshop for users of the HOL proof assistant The first two meetings were at the University of Cambridge but afterwards they were held in a variety of venues By 1992 the workshop acquired the name Higher Order Logic Theorem Proving and Its Applications In 1996 it was christened anew as Theorem Proving in Higher Order Logics TPHOLs for short and was henceforth organized as a conference Each of these transitions broadened the meeting's scope from the original HOL system to include other proof assistants based on forms of high order logic including Coq Isabelle and PVS TPHOLs has regularly published research done using ACL2 the modern version of the well known Boyer Moore theorem prover even though ACL2 implements a unique computational form of first order logic The ACL2 community has run its own series of workshops since 1999 By merging TPHOLs with the ACL2 workshop we include a broader community of researchers who work with interactive proof tools With our enlarged community it was not surprising that ITP attracted a record breaking 74 submissions each of which was reviewed by at least three Programme Committee members
