**Rationality + Consciousness = Free Will** David Hodgson, 2012-01-04 In recent years philosophical discussions of free will have focused largely on whether or not free will is compatible with determinism In this challenging book David Hodgson takes a fresh approach to the question of free will contending that close consideration of human rationality and human consciousness shows that together they give us free will in a robust and indeterministic sense In particular they give us the capacity to respond appositely to feature rich gestalts of conscious experiences in ways that are not wholly determined by laws of nature or computational rules The author contends that this approach is consistent with what science tells us about the world and he considers its implications for our responsibility for our own conduct for the role of retribution in criminal punishment and for the place of human beings in the wider scheme of things Praise for David Hodgson's previous work *The Mind Matters* magisterial It is balanced extraordinarily thorough and scrupulously fair minded and it is written in clear straightforward accessible prose Michael Lockwood *Times Literary Supplement* an excellent contribution to the literature It is well written authoritative and wonderfully wide ranging This account of quantum theory will surely be of great value On the front cover of the paper edition of this book Paul Davies is quoted as saying that this is a truly splendid and provocative book In writing this review I have allowed myself to be provoked but I am happy to close by giving my endorsement to this verdict in its entirety Euan Squires *Journal of Consciousness Studies* well argued and extremely important book Sheena Meredith *New Scientist* His reconstructions and explanations are always concise and clear Jeffrey A Barrett *The Philosophical Review* In this large scale and ambitious work Hodgson attacks a modern orthodoxy Both its proponents and its opponents will find it compelling reading J R Lucas Merton College Oxford **The Philosophical Review** Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 2002 **The Journal of Philosophy**, 2003

**Subject Guide to Books in Print**, 1993 David Hodgson David Hodgson, 2004-11 **Free Will and Consciousness** Roy Baumeister, Alfred Mele, Kathleen Vohs, 2010-07-09 This volume is aimed at readers who wish to move beyond debates about the existence of free will and the efficacy of consciousness and closer to appreciating how free will and consciousness might operate It draws from philosophy and psychology the two fields that have grappled most fundamentally with these issues In this wide ranging volume the contributors explore such issues as how free will is connected to rational choice planning and self control roles for consciousness in decision making the nature and power of conscious deciding connections among free will consciousness and quantum mechanics why free will and consciousness might have evolved how consciousness develops in individuals the experience of free will effects on behavior of the belief that free will is an illusion and connections between free will and moral responsibility in lay thinking Collectively these state of the art chapters by accomplished psychologists and philosophers provide a glimpse into the future of research on free will and consciousness

*Time and Free Will* Henri Bergson, Frank Lubecki Pogson, 2001-01-01 Bergson argues for free will by showing that the arguments against it come from a confusion of different conceptions of time As opposed to physicists idea of measurable time in human experience life is perceived as a continuous and unmeasurable flow rather than as a succession of marked off states of consciousness something that can be measured not quantitatively but only qualitatively His conclusion is that free will is an observable fact **Time and Free Will** Henri Bergson, Frank Lubecki Pogson, 1910 **Time and Free Will** Henri Bergson, 2014-02 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book The below data was compiled from various identification fields in the bibliographic record of this title This data is provided as an additional tool in helping to ensure edition identification Time And Free Will An Essay On The Immediate Data Of Consciousness Library Of Philosophy Henri Bergson Frank Lubecki Pogson G Allen Limited 1913 Consciousness Free will and determinism Space and time Time and Free Will Henri Bergson, Frank Lubecki Pogson, 1971 Bergson argues for free will by showing that the arguments against it come from a confusion of different conceptions of time As opposed to physicists idea of measurable time in human experience life is perceived as a continuous and unmeasurable flow rather than as a succession of marked off states of consciousness something that can be measured not quantitatively but only qualitatively His conclusion is that free will is an observable fact *Time and Free Will* Henri Bergson, 1921 *Time and Free Will; an Essay on the Immediate Data of Consciousness* Henri Bergson, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually

 Excerpt to consider time even our time as a cause of gauA or loss as a concrete reality or a force in its own J way Thus while we ought only to say if we kept aloof from all presuppositions concerning free will that the law of the conservation of energy governs physical phenomena and may one day be extended to all phenomena if psychological facts also prove favourable to it we go far beyond this and under the influence of a metaphysical prepossession we lay down the principle of the conservation of energy as a law which should govern all phenomena whatever or must be supposed to do so until psychological facts have actually spoken against it Science properly so called has therefore nothing to do with all this We are simply confronted with a confusion between concrete duration and abstract time two very different things In a word the so called physical determinism is reducible at bottom to a psychological determinism and it is this latter doctrine as we hinted at first that we have to examine Psychological determinism in its latest and most precise shape implies an associationist psychoiogioai conception of mind The existing state depend DEGREESnas o consciousness is first thought of as concaepfem at necessitated by the preceding states but mln d it is soon realized that this cannot be a geometrical necessity such as that which connects a resultant for example with its components For between successive conscious states there exists a difference of quality which will always frustrate any attempt to deduce any one of them a priori from its predecessors So experience is appealed to with the object of showing that the transition from one psychic state to another can always be explained by some simple reason
