By Celia Lowe Wild Profusion Biodiversity Conservation In An Indonesian Archipelago In Formation:

Wild Profusion Celia Lowe, 2006-10-03 *Wild Profusion* tracks the convergence of Indonesian biologists Sama people and flora and fauna in the Togean Islands of Sulawesi to tell the story of biodiversity conservation in 1990s Indonesia **Wild Profusion** Celia Lowe, 2013-10-31 *Wild Profusion* tells the fascinating story of biodiversity conservation in Indonesia in the decade culminating in the great fires of 1997-98 a time when the country's environment became a point of concern for social and environmental activists scientists and the many fishermen and farmers nationwide who suffered from degraded environments and faced accusations that they were destroying nature Celia Lowe argues that biodiversity in 1990s Indonesia implied a particular convergence of nature nation science and identity that made Indonesians mapping of the concept distinct within transnational practices of nature conservation at the time Lowe recounts the efforts of Indonesian biologists to document the species of the Togean Islands to develop Togaean people and to turn this archipelago off the coast of Sulawesi into a national park Indonesian scientists aspired to a conservation biology that was both internationally recognizable and politically effective in the Indonesian context Simultaneously Lowe describes the experiences of Togaean Sama people who had their own understandings of nature and nation To place Sama and scientist into the same conceptual frame Lowe studies Sama ideas in the context of transnational thought rather than local knowledge In tracking the practice of conservation biology in a postcolonial setting *Wild Profusion* explores what in nature can count as important and for whom **Insurgent Citizenship** James Holston, 2021-06-08 *Insurgent citizenships* have arisen in cities around the world This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo Brazil its entanglement with entrenched systems of inequality and its contradiction in violence James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation states one that is universally inclusive in national membership and massively inegalitarian in distributing rights and in its legalization of social differences But since the 1970s he shows residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old Their mobilizations have developed not primarily through struggles of labor but through those of the city particularly illegal residence house building and land conflict Yet precisely as Brazilians democratized urban space and achieved political democracy violence injustice and impunity increased dramatically Based on comparative ethnographic and historical research *Insurgent Citizenship* reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it Rather than view this paradox as evidence of democratic failure and urban chaos *Insurgent Citizenship* argues that contradictory realizations of citizenship characterize all democracies emerging and established Focusing on processes of city and citizen making now prevalent globally it develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories

Anthropology and Egalitarianism Eric Gable, 2010-12-03 *Anthropology and Egalitarianism* is an artful and accessible

introduction to key themes in cultural anthropology Writing in a deeply personal style and using material from his fieldwork in three dramatically different locales Indonesia West Africa and Monticello the historic home of Thomas Jefferson Eric Gable shows why the ethnographic encounter is the core of the discipline s method and the basis of its unique contribution to understanding the human condition Gable weaves together vignettes from the field and discussion of major works as he explores the development of the idea of culture through the experience of cultural contrast anthropology s fraught relationship to racism and colonialism and other enduring themes The British National Bibliography Arthur James Wells,2006 American Book Publishing Record ,2006 *Life After Logging: Reconciling Wildlife Conservation and Production Forestry in Indonesian Borneo* , **Life After Logging** E. Meijaard,Douglas Sheil,Robert Nasi,David Augeri,Barry Rosenbaum,Djoko Iskandar,Titiek Setyawati,Martjan Lammertink,Ike Rachmatika,Anna Wong,Tonny Soehartono,Scott Stanley,Timothy O'Brien,2005-01-01 This book presents a technical review of ecological and life history information on a range of Bornean wildlife species aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts It addresses three audiences 1 those involved in assessing and regulating timber harvesting activities in Southeast Asia 2 those involved in trying to achieve conservation goals in the region and 3 those undertaking research to improve multipurpose forest management This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices The recommendations can also be valuable to the many governmental and non governmental organisations promoting sustainable forest management and eco labelling Finally it identifies a number of shortcomings and gaps in knowledge which the hope can interest the scientific community and promote further research This review is an important scientific step toward understanding and improving sustainable forestry practices for long term biodiversity conservation Even in the short term however significant improvements can be made to improve both conservation and the efficiency of forest management and there is no need to delay action due to a perceived lack of information In the longer term it is expected that the recommendations from this review will be implemented and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate
