Bedeian, 2018-04-17 First published in

1993 This volume compiles the autobiographies of the management discipline's most distinguished laureates. Prior to this publication, the available management literature provided little insight into the personal and intellectual lives, the frustrations as well as the triumphs of the individuals in the management discipline. Although such understanding could be conveyed in many forms, perhaps the most intimate and fascinating of these for gaining behind-the-scenes insights is the autobiography. Thus, the autobiographies in this volume, as in the five companion volumes, offer the reader not only a glimpse of the subjective determinants and personal experiences of the management discipline's most distinguished laureates but also a deeper understanding of what management is and what it is becoming. The various accounts reflect a diversity of approaches, interests, and experiences.

Program Evaluation Susan P. Giancola, 2025-04-14 This text aims to build evaluation capacity by increasing knowledge about evaluation and improving skills to conduct evaluations. The book's embedded approach uses program theory to understand relationships between activities and objectives, logic modeling to represent the program's theory, and an evaluation matrix to structure the evaluation within the program. The approach is systematic and focused on continuous improvement. The Second Edition adds topics suggested by users of the book, incorporates content that the author has added to her own classes, and covers emerging areas in evaluation since the publication of the first edition, such as artificial intelligence and equity in evaluation. A companion website at <http://edge.sagepub.com/Giancola2e> includes a number of instructor resources, including editable PowerPoint slides and assignments.
