like They have also integrated the new concepts of advanced software specification languages

**Situational Method Engineering: Fundamentals and Experiences** Jolita Ralyté, Sjaak Brinkkemper, Brian Henderson-Sellers, 2007-12-31 This proceedings volume contains the papers of the scientific program of the IFIP Working Group 8.1 working conference on Situational Method Engineering Fundamentals and Experiences. The conference has been held from 12 to 14 September 2007 at the University of Geneva in Switzerland. Since the early 1980s the IFIP WG8.1 working conferences have provided a forum for the presentation and exchange of research results and practical experiences within the field of information systems development methods. After two successful Method Engineering conferences in Atlanta in 1996 and in Kanazawa in 2002 it is now time again to provide a forum for the exchange of ideas in and give a state of the art overview in Method Engineering. The conference programme features three invited keynote presentations, paper presentations and one interactive panel session. Besides tutorials have been arranged to learn about the basics of Method Engineering. The format of a working conference allows for extensive paper discussions featured by discussion reviews in plenary sessions. Over the last decade Method Engineering defined as the engineering discipline to design, construct and adapt methods including supportive tools has emerged as the research and application area for using methods for systems development.

**Fundamentals of Software Engineering** Farhad Arbab, Marjan Sirjani, 2010-01-25 The present volume contains the proceedings of the Third IPM International Conference on Fundamentals of Software Engineering (FSEN) Kish, Iran, April 15-17, 2009. FSEN 2009 was organized by the School of Computer Science at the Institute for Studies in Fundamental Sciences (IPM) in Iran in cooperation with the ACM SIGSOFT and IFIP WG 2.2. This conference brought together around 100 researchers and practitioners working on different aspects of formal methods in software engineering from 15 different countries. The topics of interest in FSEN span over all aspects of formal methods, especially those related to advancing the application of formal methods in software industry and promoting their integration with practical engineering techniques. The Program Committee of FSEN 2009 consisted of top researchers from 24 different academic institutes in 11 countries. We received a total of 88 submissions from 25 countries, out of which the Program Committee selected 22 as regular papers, 5 as short papers and 7 as poster presentations in the conference program. Each submission was reviewed by at least three independent referees for its quality, originality, contribution, clarity of presentation and its relevance to the conference topics. This volume contains the revised versions of the regular and short papers presented at FSEN 2009. Three distinguished keynote speakers delivered their lectures at FSEN 2009 on models of computation, automata and processes, Jos Baeten, verification, performance analysis and controllers synthesis for real time systems, Kim Larsen, and theory and tool for component based model driven development in rCOS, Zhiming Liu. Our invited speakers also contributed to this volume by submitting their keynote papers which were accepted after they were reviewed by independent referees.
