- Un régime basé essentiellement sur le «taux de l'unité».
- Chaque employeur était assigné à une «unité de classification» selon son activité économique.
- Chaque employeur appartenant à la même unité de classification payait le même « taux de l'unité » par tranche de 100 \$ de masse salariale assurable.

The Official CHFI Study Guide (Exam 312-49) Dave Kleiman, 2011-08-31 This is the official CHFI Computer Hacking Forensics Investigator study guide for professionals studying for the forensics exams and for professionals needing the skills to identify an intruder's footprints and properly gather the necessary evidence to prosecute. The EC Council offers certification for ethical hacking and computer forensics. Their ethical hacker exam has become very popular as an industry gauge and we expect the forensics exam to follow suit. Material is presented in a logical learning sequence: a section builds upon previous sections and a chapter on previous chapters. All concepts, simple and complex, are defined and explained when they appear for the first time. This book includes Exam objectives covered in a chapter, clearly explained in the beginning of the chapter. Notes and Alerts highlight crucial points. Exam's Eye View emphasizes the important points from the exam's perspective. Key Terms present definitions of key terms used in the chapter. Review Questions contain the questions modeled after real exam questions based on the material covered in the chapter. Answers to the questions are presented with explanations. Also included is a full practice exam modeled after the real exam. The only study guide for CHFI provides 100% coverage of all exam objectives. CHFI Training runs hundreds of dollars for self tests to thousands of dollars for classroom training.

The Worker's Guide to Social Legislation, 1984 **Regulating Workplace Risks** David Walters, R. Johnstone, Kaj Frick, Michael Quinlan, Geneviève Baril-Gingras, Annie Thébaud-Mony, 2011-01-01 State of the art research into the state of the art of occupational health and safety management and inspection. Its authors provide awarts and all assessment of the possibilities and limits of regulating health and safety in an increasingly challenging environment. A must read for anyone concerned about improving workplace health and safety in the new world of work. Eric Tucker York University Canada. This book long in gestation provides a profound analysis of the challenge to labour inspection of regulating OHS through a focus on management systems. Its detailed analysis of 5 disparate countries is a treasure trove of research providing a rich opportunity for learning across jurisdictions. It provides a masterly dissection of the increasingly complex competitive and pared down context of globalisation and then challenges it. Recording some successes but more shortcomings it is food for deep reflection by inspectorates and politicians internationally. Andrew Hale Hastam UK and Emeritus Professor Delft University The Netherlands. Despite the complaints of neo liberal ideologists about the burden on business this book argues that there is no justification for reduced regulation and regulatory surveillance of health and safety at work. Drawing on analyses of the role played by labour inspection in Australia Sweden Canada France and the UK the authors provide a timely examination of the contemporary organisational and other challenges it faces with particular reference to the inadequacy of self regulation and the rise of systematic occupational health and safety management. Theo Nichols Cardiff University UK. An impressively broad and sophisticated study of a critical aspect of OHS regulation. This is the best socio legal analysis available of the contexts strategies and practices involved in inspection of approaches to managing

health and safety in the face of change Neil Gunningham Australian National University Canberra Regulating Workplace Risks is a study of regulatory inspection of occupational health and safety OHS and its management in five countries Australia Canada Quebec France Sweden and the UK during a time of major change It examines the implications of the shift from specification to process based regulation in which attention has been increasingly directed to the means of managing OHS more systematically at a time in which a major restructuring of work has occurred in response to the globalised economy These changes provide both the context and material for a wider discussion of the nature of regulation and regulatory inspection and their role in protecting the health safety and well being of workers in advanced market economies With its comparative nature and empirical studies this book will appeal to OHS policy makers and regulators all over the world as well as students in the field of occupational health and safety regulation internationally
