Grossmann,2022-06-03 State of the art in science engineering aspects of rock mechanics in the areas of safety environmental protection Discusses various aspects concerning modelling in safety analysis stability of underground structures and the contribution of incident and accident cases to the progress of rock engineering activities The influence of the environment is also considered namely in heat mass transport contaminant migration and underground storage of waste products *Universal Concept of Complexity by the Dynamic Redundance Paradigm* Andrei P. Kirilyuk,1997 **Vegetation Index and Dynamics** Eusebio Cano

Carmona,Ricardo Quinto Canas,Ana Cano Ortiz,Carmelo Maria Musarella,2022-02-23 The book contemplates different ways of approaching the study of vegetation as well as the type of indices to be used However all the works pursue the same objective to know and interpret nature from different points of view either through knowledge of nature in situ or the use of technology and mapping using satellite images Chapters analyze the ecological parameters that affect vegetation the species that make up plant communities and the influence of humans on vegetation Nonlinearity in Structural Dynamics K Worden,2019-04-23 Many types of engineering structures exhibit nonlinear behavior under real operating conditions Sometimes the unpredicted nonlinear behavior of a system results in catastrophic failure In civil engineering grandstands at sporting events and concerts may be prone to nonlinear oscillations due to looseness of joints friction and crowd movements

### **The Penetrometer and Soil Exploration**

G. Sanglerat,2012-12-02 The Penetrometer and Soil Exploration Interpretation of Penetration Diagrams Theory presents the many uses of the penetrometer for investigating soil conditions Testing methods include the following 1 in situ load tests on full scale foundations 2 laboratory testing of undisturbed samples and 3 in situ testing of soils The book regards the advantages of using the penetrometer as a handy tool in drilling and sampling The text emphasizes that the investigator should never rely entirely on the analogy or the extrapolation of information pertaining to a nearby site The text describes the different shapes of the penetrometer diagrams obtained from tests in homogeneous cohesionless soil as well as the significance of the embedment of a pile into the bearing stratum for deep foundation designs The paper discusses the De Beer theory Kerisel s theory and the theory developed at the Delft Laboratory of Soil Mechanics The laboratory determines the maximum soil pressure and the corresponding embedment of the pile According to Professor L Herminier the bearing capacity of a pile may be determined from laboratory tests on soil samples the other by extrapolating penetrometer data The book is suitable for structural engineers civil engineers geologists architects and students of soil mechanics

### **Dynamic**

**Structure of Reality** Nelson R. Orringer,2010-10-01 Dynamic Structure of Reality makes available in English some of the most mature thought of the modern Spanish philosopher Xavier Zubiri He first presented this material as a set of 1968 public lectures in Madrid They were collected edited and published in 1989 as Estructura din mica de la realidad In 1962 Zubiri had published Sobre la esencia On essence a work of metaphysics that was praised by critics with one qualification its treatment of reality was too static The 1968 course was devised as a response to those critics Dynamic Structure of Reality retraces the road Hegel traveled concerning the creation of a self and how that self is realized by an interplay between spirit and nature Like his great predecessor Jos Ortega y Gasset and like his great Jewish contemporary Emmanuel Levinas Zubiri takes religion in all seriousness and locates its questions within the questions of modern philosophy In harmony with science he advances a new idea of becoming Reality not being becomes As reality s traits are revealed in different degrees reality resembles God the universal self giver Zubiri systematically touches on many disciplines to show the varieties of self giving

developmental and cognitive psychology psycho and sociolinguistics as well as second language acquisition the book connects topics rarely found in the same empirical piece including the role of cognitive functioning and socioaffective factors the temporal specificity of L2 sociolinguistic development in production and perception and the issue of group to individual generalizability The studies showcased in this work provide ample evidence that late starters of a L2 in early adulthood and midlife can acquire the skills necessary to successfully navigate the complex sociolinguistic variation within the target language community but the process is certainly not one without hurdles

**Dynamic Dichotomy** Catherine Attwood,1998 The principal concern of this book expounded in the first chapter is to chart the development of literary awareness amongst poets of the later Middle Ages whose marked stance of professional independence led them increasingly to distinguish between their implied literary selves and the first person speakers of their texts Four chapters examine by means of close stylistic analysis the implications of such detachment taken as a model of binary opposition for the elaboration of the first person speaker Thus in the case of Machaut the essential distinction is between the first person and the second or third the I and the Other with Froissart between the I of the present and the I of the past with Deschamps between the internal I of the poet and a vast array of external personae with Christine de Pizan between the blueprint of a persona evolved by the poet for her internal I and the transformations implied by its imposition on external personae The final chapter on the poetics of debate explores the means by which the I may be divided in order to arrive at an objective knowledge of both its own nature and of external truths the ideal expression of which is the written record of the debate itself It is the primacy of the Book as an autonomous entity which ultimately exercises the most far reaching influence on the development of the poetic I in this period
