Dynamics Of Human Biocultural Diversity A Unified Approach:

Dynamics of Human Biocultural Diversity Elisa J. Sobo, 2016-06-16 This lively text by leading medical anthropologist Elisa J Sobo offers a unique holistic approach to human diversity and rises to the challenge of truly integrating biology and culture The inviting writing style and fascinating examples make important ideas from complexity theory and epigenetics accessible to students In this second edition the material has been updated to reflect changes in both the scientific and socio cultural landscape for example in relation to topics such as the microbiome and transgender Readers learn to conceptualize human biology and culture concurrently as an adaptive biocultural capacity that has helped to produce the rich range of human diversity seen today With clearly structured topics an extensive glossary and suggestions for further reading this text makes a complex interdisciplinary topic a joy to teach

Dynamics of Human Biocultural Diversity Elisa Janine Sobo, 2020 This lively text by leading medical anthropologist Elisa J Sobo offers a unique holistic approach to human diversity and rises to the challenge of truly integrating biology and culture The inviting writing style and fascinating examples make important ideas from complexity theory and epigenetics accessible to students In this second edition the material has been updated to reflect changes in both the scientific and socio cultural landscape for example in relation to topics such as the microbiome and transgender Readers learn to conceptualize human biology and culture concurrently as an adaptive biocultural capacity that has helped to produce the rich range of human diversity seen today With clearly structured topics an extensive glossary and suggestions for further reading this text makes a complex interdisciplinary topic a joy to teach

Three Worlds of Collective Human Experience: Individual Life, Social Change, and Human Evolution Victor N. Shaw, 2018-08-22 This book explores three worlds shared by the humans in their collective experiences It identifies and explores the world of commonsense the world of religion and the world of science as three essential dimensions of human experience The book helps understand that humans can gain comfort and pleasure in commonsense achieve meaning and purpose from religion and attain truth and rationality through science It actively applies theories to and develops theoretical explanations from different domains or situations of human existence This book is of interest to theorists researchers instructors and students across major academic disciplines in the humanities and social sciences

Human Adaptive Strategies Daniel Bates, Judith Tucker, Ludomir Lozny, 2023-05-31 This book introduces students to cultural anthropology with an emphasis on environmental and evolutionary approaches focusing on how humans adapt to their environment and how the environment shapes culture It shows how cultures evolve within the context of people s strategies for surviving and thriving in their environments This approach is widely used among scholars as a cross disciplinary tool that rewards students with valuable insights into contemporary developments Drawing on anthropological case studies the authors address immediate human concerns such as the costs and consequences of human energy requirements environmental change and degradation population pressure social and economic equity and planned and unplanned change Impacts of increasingly rapid climatic

change on equitable access to resources and issues of human rights are discussed throughout Towards the end of the book the student is drawn into a challenging thought experiment addressing the possible impacts of climatic warming on Middle America in the year 2040 All chapters conclude with Summary Key Terms and Suggested Readings This book is an ideal text for students of introductory anthropology and archaeology environmental studies world history and human and cultural ecology courses

Sex and Gender L. Zachary DuBois, Anelis Kaiser Trujillo, Margaret M. McCarthy, 2025-05-16 This open access book provides an interdisciplinary perspective on the study of sex and gender and suggests directions for future research in multiple fields Sex and gender are understood measured and applied in different ways across society and science To foster interdisciplinary dialogue and to promote informed applications in research policy medicine and public health the Ernst Strüngmann Forum convened scholars from diverse fields to examine a widely held assumption that sex and gender are conceptually separate Synthesizing the interdisciplinary perspectives that emerged from this discourse this volume explores the entanglement of sex and gender suggesting that they are co constituted in ways that have not been fully understood This entanglement is examined from multiple perspectives research challenges are explored and ways to move forward are proposed to advance basic and developmental systems biology human biomedical and clinical research as well as policy and practice The book should be of interest to policymakers as well as researchers working in anthropology behavioral neuroendocrinology cellular and molecular neuroscience clinical psychology epidemiology and feminist gender and transgender studies

Society and the Environment Michael S Carolan, 2020-03-10 Without focusing entirely on what is wrong with the world around us the third edition of *Society and the Environment* centers its discussion on realistic solutions to the problems that persist and examines current controversies within a socio organizational context After introducing pragmatic environmentalism Carolan discusses the complex pressures and variables that exist where ecology and society collide such as population growth and the concurrent increase in demands for food and energy and transportation and its outsized influence on urban and community patterns With further attention given to the social phenomena and structural dynamics driving today's environmental problems the book concludes with an important reflection on truly sustainable solutions and what constitutes meaningful social change Each chapter in this interdisciplinary text follows a three part structure beginning with an overview of what is wrong and why This leads into a discussion on each issue's wide ranging implications and finally a balanced consideration of realistic solutions Featuring updated and expanded examples discussion points and coverage of recent developments including the US withdrawing from the Paris Agreement booming national economies and wealth distribution growing global interest in environmental justice with particular focus on the links between injustice and race and inequality climate change and renewable energy this new edition remains an essential companion for courses on environmental sociology and sustainability

anthropologists as well as an excellent textbook for courses in medical anthropology ethnomedicine global health care and medical policy *Our Common Denominator* Christoph Antweiler,2016-04-01 Since the politicization of anthropology in the 1970s most anthropologists have been reluctant to approach the topic of universals that is phenomena that occur regularly in all known human societies In this volume Christoph Antweiler reasserts the importance of these cross cultural commonalities for anthropological research and for life and co existence beyond the academy The question presented here is how anthropology can help us approach humanity in its entirety understanding the world less as a globe with an emphasis on differences but as a planet from a vantage point open to commonalities **Transforming Lives** Alexander

Rödlach,2020-07-23 Faith community nursing and health ministry programs in congregations have increasingly been recognized as having a significant impact on the health and well being of individuals Based on a case study in Omaha Nebraska *Transforming Lives* Health Initiatives in Faith Communities documents how nurses and health ministers touch and transform the recipients of their services and the participants in activities they organize Alexander R dlach argues that much of their success is due to their ability to collaborate with leadership in congregations and health systems These programs have the potential to become significant partners with health systems and governments in providing health services to communities

The Anthropocenic Turn GABRIELE DÜRBECK,PHILIP HÜPKES,2020-03-12 This interdisciplinary volume discusses whether the increasing salience of the Anthropocene concept in the humanities and the social sciences constitutes an Anthropocenic turn The Anthropocene discourse creates novel conceptual configurations and enables scholars to re negotiate and re contextualize long established paradigms premises theories and methodologies These innovative constellations stimulate fresh research in many areas of thought and practice The contributors to this volume respond to the proposition of an Anthropocene turn from the perspective of diverse research fields including history of science philosophy environmental humanities and political science as well as literary art and media studies Altogether the collection reveals to which extent the Anthropocene concept challenges deep seated assumptions across disciplines It invites readers to explore the wealth of scholarly perspectives on the Anthropocene as well as unexpected inter and transdisciplinary connections

The anthropology of power, agency, and morality Victor de Munck,Elisa J. Sobo,2022-06-07 The works of F G Bailey 1924 2020 provide a seminal template for good ethnography Central to this is Bailey s ability to conceptually connect the well described micro contexts of individual interactions to the macro context of culture Bailey s core concerns the tension between individual and collective interests the will to power and the dialectics of social forces which foster both collective solidarity as well as divisiveness and discontent are themes of universal interest the beauty of his work lies in his analyses of how these play out in local arenas between real people His models provide nuanced yet explicit road maps to analysing the different leadership styles of everyday people and contemporary leaders This volume seeks to inspire new generations of anthropologists to revisit Bailey s seminal texts to help them navigate their way through the ethnographic thicket of their

own research **The Real Cost of Cheap Food** Michael Carolan, 2018-02-06 This thought provoking but accessible book critically examines the dominant food regime on its own terms by seriously asking whether we can afford cheap food and by exploring what exactly cheap food affords us Detailing the numerous ways that our understanding of food has narrowed such as its price per ounce combination of nutrients yield per acre or calories the book argues for a more contextual view of food when debating its affordability The first edition published in 2011 was widely praised for its innovative approach and readability In this new edition the author brings all data and citations fully up to date Increased coverage is given to many topics including climate change aquaculture financialization BRICS countries food based social movements gender and ethnic issues critical public health and land succession There is also greater discussion about successful cases of social change throughout all chapters by including new text boxes that emphasize these more positive messages The author shows why today's global food system produces just the opposite of what it promises The food produced under this regime is in fact exceedingly expensive Many of these costs will be paid for in other ways or by future generations and cheap food today may mean expensive food tomorrow By systematically assessing these costs the book delves into issues related but not limited to international development national security healthcare industrial meat production organic farming corporate responsibility government subsidies food aid and global commodity markets It is shown that exploding the myth of cheap food requires we have at our disposal a host of practices and policies *Food Diversity Between Rights, Duties and Autonomies* Alessandro Isoni, Michele Troisi, Maurizia Pierri, 2018-04-25 The book reflects on the issues concerning on the one hand the difficulty in feeding an ever increasing world population and on the other hand the need to build new productive systems able to protect the planet from overexploitation The concept of food diversity is a synthesis of diversities biodiversity of ecological sources of food supply socio territorial diversity and cultural diversity of food traditions In keeping with this transdisciplinary perspective the book collects a large number of contributions that examine firstly the relationships between agrobiodiversity rural sustainable systems and food diversity and secondly the issues concerning typicality food specialties food identities rural development and territorial communities Lastly it explores legal questions concerning the regulations aiming to protect both the food diversity and the right to food in the light of the political economic and social implications related to the problem of feeding the world population while at the same time respecting local communities rights especially in the developing countries The book collects the works of legal scholars agroecologists historians and sociologists from around the globe **Biocultural Diversity in Europe** Mauro Agnoletti, Francesca Emanuelli, 2016-02-29 The book collects a selection of the papers presented at the meeting held in the context of the Joint Programme on the Links between Biological and Cultural Diversity JP BiCuD Recognizing the inextricable link between biological and cultural diversity the United Nations Educational Scientific and Cultural Organization UNESCO and the Secretariat of the Convention on Biological Diversity SCBD joined forces and in 2010 launched the Joint Programme on the Links between Biological and Cultural Diversity JP

BiCuD The first meeting for the implementation of the JP BiCuD was held in Florence Italy in April 2014 and produced the UNESCO sCBD Florence Declaration which highlights the concept of biocultural diversity The European rural territory is predominantly a biocultural multi functional landscape providing a crucial and effective space for integration of biological and cultural diversity suggesting the need to revise some of the current strategies for the assessment and management of biodiversity

Edges, Fringes, Frontiers Thomas Henfrey, 2018-09-14 Based on an ethnographic account of subsistence use of Amazonian forests by Wapishana people in Guyana *Edges Frontiers Fringes* examines the social cultural and behavioral bases for sustainability and resilience in indigenous resource use Developing an original framework for holistic analysis it demonstrates that flexible interplay among multiple modes of environmental understanding and decision making allows the Wapishana to navigate socio ecological complexity successfully in ways that reconcile short term material needs with long term maintenance and enhancement of the resource base *Abstracts of the Annual Meeting -- American Anthropological Association* American Anthropological Association, 1995 *Choice*, 2005-09 [Paperbound Books in Print](#), 1992

Race and Human Diversity Robert L. Anemone, 2019-02-18 *Race and Human Diversity* is an introduction to the study of human diversity in both its biological and cultural dimensions Robert L Anemone examines the biological basis of human difference and how humans have biologically and culturally adapted to life in different environments The book discusses the history of the race concept evolutionary theory human genetics and the connections between racial classifications and racism It invites students to question the existence of race as biology but to recognize race as a social construction with significant implications for the lived experience of individuals and populations This second edition has been thoroughly revised with new material on human genetic diversity developmental plasticity and epigenetics There is additional coverage of the history of eugenics race in US history citizenship and migration affirmative action and white privilege and the burden of race Fully accessible for undergraduate students with no prior knowledge of genetics or statistics this is a key text for any student taking an introductory class on race or human diversity Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
