Early Years Science Education Mike Watts, Alison Silby, 2020-04-28 The educational provision for early years is growing and changing across many parts of the world not least in the UK While this book leans heavily on the mounting literature on early child development in its broadest sense physically emotionally linguistically its central focus lies squarely on the growth of children's scientific thinking and activities Written by educators this book is based both on formal educational research and professional practice in action The authors describe children's science concept development their curiosity driven exploration emergent ecological literacy their learning through science play the assessment of early learning the role of parents and practitioners within early education contexts and some question the very basis of the science being taught Illustrations and examples of practice are not confined to the UK though the messages to be derived from each chapter have application way beyond the immediate context This book was originally published as a special issue of Early Child Development and Care

Early Childhood Tina Bruce, 2010-01-20 Designed for students on Early Years Foundation Degrees and Early Childhood courses Early Years professionals and Teaching Assistants this engaging text provides a comprehensive introduction to the field of early childhood Written and edited by experts in the field the book clearly explains theory through illustrations of good practice with case studies reflective exercises and suggestions for further reading Additional case studies and reflective questions for student or lecturer's use can be found on the SAGE website Each chapter has been revised with an emphasis on encouraging reflective practice and there are new chapters on personal social and emotional development EYPS health and safeguarding children This brand new edition has also been updated in light of the new Early Years Foundation Stage and addresses the needs of students working towards Early Years Professional Status EYPS

Knowledge and Understanding of the World in the Early Years Foundation Stage Stella Louis, 2012-11-12 The Practical Guidance in the Early Years Foundation Stage series will assist practitioners in the smooth and successful implementation of the Early Years Foundation Stage Each book gives clear and detailed explanations of each aspect of Learning and Development and encourages readers to consider each area within its broadest context to expand and develop their own knowledge and good practice Practical ideas and activities for all age groups are offered along with a wealth of expertise of how elements from the practice guidance can be implemented within all early years settings The books include suggestions for the innovative use of everyday resources popular books and stories Knowledge and understanding of the world cuts across all of the EYFS guiding themes and this book will encourage practitioners to think about and develop their own understanding of the implications for inclusion respect for oneself and for others irrespective of ethnicity culture or religion home language family background learning difficulties gender disabilities or abilities

Science Beyond The

Classroom Boundaries For 3-7 Year Olds Bianchi, Lynne, Feasey, Rosemary, 2011-06-01 This truly innovative practical book supports primary schools in rethinking where teaching and learning in primary science and technology should take place and in promoting the nature of pupil independence in choosing when and why to take their learning outside the classroom boundaries This approach builds on the good practice begun in Foundation Stage and ensures that children's personal capabilities are further developed in relation their understanding and skills in science by working in the school environment

EBOOK: CREATIVITY IN PRIMARY SCIENCE Jenny Frost, 1997-01-16 How do primary teachers incorporate all the facets of science in their teaching How do primary teachers plan and replan their science teaching in the light of how children are learning How do primary teachers retain lively and imaginative science teaching within the constraints of a specified curriculum This book is about the very best of primary classroom practice in science six teachers six schools six science topics with children from ages five to eleven years The teaching and children's learning are described in a straightforward style richly illustrated by pen and ink drawings made from photographs and by examples of children's work The author has provided a commentary on the particular classroom examples by linking them to a wider discussion of science in primary schools and by sharing the teachers own rationale for their decisions The book was written initially for beginning teachers but experienced teachers who reviewed the drafts welcomed the combination of real classroom examples coupled with a more theoretical commentary Above all they welcomed the essence of the book which as the opening sentence indicates is about creativity in teaching and a celebration of the skills and expertise of primary teachers in the area of science The book will be invaluable reading for both trainee and practising primary school teachers

Understanding Children's Learning Claire Alfrey, 2013-08-21 Structured to support teaching assistants this pioneering textbook provides an academic underpinning to each of the key topics studied The book develops the theoretical knowledge needed to enhance work in the classroom encourages students to reflect on their own practice is in an ideal textbook format full of tasks questions summaries and reading lists and covers both primary and secondary years Practical easy to read and written specifically for teaching assistants this book is also applicable for any trainee teachers or students of education

Understanding Schemas in Young Children Stella Louis, Clare Beswick, Sally Featherstone, 2013-06-20 What are schemas and why do they matter Again Again provides an introduction to understanding and supporting schemas and schema play in young children Practitioners will find an overview of schemas with guidance on where they fit within the EYFS There are examples of schemas with illustrations and descriptions of common behaviour patterns and these are set within the general context of child development The intention is to help early years practitioners identify schemas and to understand both how important they are and the vital role they play in the growing child's learning The aim is to help the reader understand how they can develop plan and resource activities which support children's learning through experiment and play

Knowledge and Understanding of the World Richard Woolley, Jane Johnston, Emily Rotchell, 2011-01-13 Beginning Teaching, Beginning

Learning: In Early Years and Primary Education Janet Moyles, Jane Payler, Jan Georgeson, 2017-06-16 This bestselling textbook provides an introduction to the fundamentals of teaching and learning in early years and primary education. If you are training to work in schools or other educational settings, the book offers a wide range of practical and straightforward guidance covering essential topics such as safeguarding, attachments and relationships, assessment, the indoor and outdoor environment, new technologies, behaviour management, and well-being. Thoroughly updated throughout and retaining its lively and engaging style, this new fifth edition extends your knowledge and understanding of working and playing effectively with young children. Enlivened by thought-provoking cameos and reflective questions, the book gives you the confidence to reflect upon challenge and enhance your own pedagogies. Key features include: Real-life cameos drawn from schools and settings; Questions to promote thinking included in each chapter; Suggested further reading including a range of annotated references; Up-to-date research and issues that teachers may face. Beginning Teaching, Beginning Learning is essential reading for student and newly qualified early years and primary teachers and practitioners, as well as those who educate and train them. This outstanding book should be a core text for beginning teachers working in the birth to 11 age range. It places Early Years and Primary education in the historical context and encourages new teachers to become reflective practitioners by adopting a questioning approach based on thoughtful comparative experiences. One aspect which makes this stand out from other similar texts is the focus it has on developing a deep understanding of the partnership between children's learning and the beginner teacher. Contributors, many of whom have been teachers themselves, include experts not only in their specific fields of interest but also in teacher education more broadly, so understand what is relevant for those on initial teacher education courses and those in the early stages of their teaching career. Jane Warwick, Primary PGCE Course Manager, University of Cambridge, UK. Beginning Teaching, Beginning Learning should be a core text on all birth to 11 years ITT courses. The book neatly combines grounded cameos of actual teaching experience with real-life questions and dovetails these with a thoroughly referenced scholarly critique. Through its engaging style and approach, the book speaks clearly and directly to the inquisitive, curious, and professional novice teacher who wishes to be both thoroughly reflective and knowledgeable of the latest research. This book is hugely successful as it manages to be both very wide in its content whilst encouraging a questioning and in-depth critical thinking throughout. Guy Roberts, Holmes MA, Early Years Education Programme Director, UCL Institute of Education, UK. Creativity in Primary Education Anthony Wilson, 2009-05-11 A sound understanding of the role primary creativity plays in learning and teaching will help trainee teachers become creative practitioners and develop creativity in their pupils. The second edition of this popular text retains key material from the previous book but it has been substantially updated and revised to include six new chapters which explore creativity in both a subject-specific context as well as the broader issues of creativity in SMSC and the Foundation Stage. The book is linked throughout to the Standards for the award of QTS and also considers important government agendas such as Every Child Matters. **NASA's Exploration**
