## **Getting The Goods Ports Labor And The Logistics:**

*Getting the Goods* Edna Bonacich, Jake B. Wilson, 2011-03-15 In *Getting the Goods* Edna Bonacich and Jake B Wilson focus on the Southern California ports of Los Angeles and Long Beach which together receive 40 percent of the nearly 2 trillion worth of goods imported annually to the United States to examine the impact of the logistics revolution on workers in transportation and distribution Built around the invention of shipping containers and communications technology the logistics revolution has enabled giant retailers like Wal Mart and Target to sell cheap consumer products made using low wage labor in developing countries The goods are shipped through an efficient low cost intermodal freight system in which containers are moved from factories in Asia to distribution centers across the United States without ever being opened Bonacich and Wilson follow the flow of imports from Asian factories exploring the roles of importers container shipping companies the ports railroad and trucking companies and warehouses At each stage *Getting the Goods* raises important questions about how the logistics revolution affects logistics workers Drawing extensively on interviews with workers and managers at all levels of the supply chain on industry reports and on economic data Bonacich and Wilson find that in general conditions have deteriorated for workers But they also discover that changes in the system of production and distribution provide new strategic opportunities for labor to gain power A much needed corrective to both uncritical celebrations of containerization and the global economy and pessimistic predictions about the future of the U S labor movement *Getting the Goods* will become required reading for scholars and students in sociology political economy and labor studies

**Df-Getting the Goods Z** Bonacich, Wilson, 2011-02-23      **Reconstructing Solidarity** Virginia Doellgast, Nathan Lillie, Valeria Pulignano, 2018-01-11 Work is widely thought to have become more precarious Many people feel that unions represent the interests of protected workers in good jobs at the expense of workers with insecure employment low pay and less generous benefits *Reconstructing Solidarity* Labour Unions Precarious Work and the Politics of Institutional Change in Europe argues the opposite that unions try to represent precarious workers using a variety of creative campaigning and organizing tactics Where unions can limit employers ability to exit labour market institutions and collective agreements and build solidarity across different groups of workers this results in a virtuous circle establishing union control over the labour market Where they fail to do so it sets in motion a vicious circle of expanding precarity based on institutional evasion by employers *Reconstructing Solidarity* examines how unions build or fail to build inclusive worker solidarity to challenge this vicious circle and to re regulate increasingly precarious jobs Comparative case studies from fourteen European countries describe the struggles of workers and unions in industries such as local government retail music metalworking chemicals meat packing and logistics Their findings argue against the thesis that unions act primarily to protect labour market insiders at the expense of outsiders      **Handbook of Manufacturing Industries in the World Economy** John R. since the 1950s by the presence of the shipping container A globally standardized object the container carries cargo moving in international trade and it utilizes and fits within the existing transportation infrastructures of shipping trucking and railroads In this way it binds them together into a nearly seamless worldwide logistics network This process occurs not only in ocean shipping and at ports but also deep within national territories In its dependence on existing infrastructural systems though the network of container movement as it pervades domestic space is shaped by the history and geography of the nation state This global network is not invariably imposed in a top down manner to a large degree it is cobbled together out of national regional and local systems Heins describes this in the American context examining the freight transportation infrastructures of railroads trucking and inland waterways and also the terminals where containers are transferred between train and truck The book provides a detailed historical narrative and is also theoretically informed by the contemporary literature on infrastructure and globalization

**In the Interest of Others** John S. Ahlquist, Margaret Levi, 2013-09-08 A groundbreaking study of labor unions that advances a new theory of organizational leadership and governance In the Interest of Others develops a new theory of organizational leadership and governance to explain why some organizations expand their scope of action in ways that do not benefit their members directly John Ahlquist and Margaret Levi document eighty years of such activism by the International Longshore and Warehouse Union in the United States and the Waterside Workers Federation in Australia They systematically compare the ILWU and WWF to the Teamsters and the International Longshoremen's Association two American transport industry labor unions that actively discouraged the pursuit of political causes unrelated to their own economic interests Drawing on a wealth of original data Ahlquist and Levi show how activist organizations can profoundly transform the views of members about their political efficacy and the collective actions they are willing to contemplate They find that leaders who ask for support of projects without obvious material benefits must first demonstrate their ability to deliver the goods and services members expect These leaders must also build governance institutions that coordinate expectations about their objectives and the behavior of members In the Interest of Others reveals how activist labor unions expand the community of fate and provoke preferences that transcend the private interests of individual members Ahlquist and Levi then extend this logic to other membership organizations including religious groups political parties and the state itself

**The Sea and International Relations** Benjamin de Carvalho, Harvard Leira, 2022-07-26 While the world's oceans cover more than seventy percent of its surface the sea has largely vanished as an object of enquiry in International Relations IR being treated either as a corollary of land or as time Yet the sea is the quintessential international space and its importance to global politics has become all the more obvious in recent years Drawing on interdisciplinary insights from IR Historical Sociology Blue Humanities and Critical Ocean Studies The sea and International Relations breaks with this trend of oceanic amnesia and kickstarts a theoretical conceptual and empirical discussion about the sea and IR by highlighting theoretical puzzles analysing broad historical perspectives and addressing

contemporary challenges In bringing the sea back into IR the book reconceptualises the canvas of international relations to include the oceans as a social political economic and military space which affects the workings of world politics

**Blue and Green** Scott L. Cummings, 2018-11-13 How an alliance of the labor and environmental movements used law as a tool to clean up the trucking industry at the nation's largest port In *Blue and Green* Scott Cummings examines a campaign by the labor and environmental movements to transform trucking at America's largest port in Los Angeles Tracing the history of struggle in an industry at the epicenter of the global supply chain Cummings shows how an unprecedented blue green alliance mobilized to improve working conditions for low income drivers and air quality in nearby communities The campaign for clean trucks Cummings argues teaches much about how social movements can use law to challenge inequality in a global era Cummings shows how federal deregulation created interrelated economic and environmental problems at the port and how the campaign fought back by mobilizing law at the local level He documents

three critical stages initial success in passing landmark legislation requiring port trucking companies to convert trucks from dirty to clean and drivers from contractors to employees with full labor rights campaign decline after industry litigation blocked employee conversion and campaign resurgence through an innovative legal approach to driver misclassification that realized a central labor movement goal unionizing port truckers Appraising the campaign Cummings analyzes the tradeoffs of using alternative legal frameworks to promote labor organizing and explores lessons for building movements to regulate low wage work in the gig economy He shows how law can bind coalitions together and split them apart and concludes that the fight for legal reform never ends but rather takes different turns on the long road to justice      **Contours of the**

**The City Is the Factory** Miriam Greenberg, Penny Lewis, 2017-06-06 Urban public spaces from the streets and squares of Buenos Aires to Zuccotti Park in New York City have become the emblematic sites of contentious politics in the twenty first century As the contributors to The City Is the Factory argue this resurgent politics of the square is itself part of a broader shift in the primary locations and targets of popular protest from the workplace to the city This shift is due to an array of intersecting developments the concentration of people profit and social inequality in growing urban areas the attacks on and precarity faced by unions and workers movements and the sense of possibility and actual leverage afforded by local politics and the tactical use of urban space Thus the city from the town square to the banlieu is becoming like the factory of old a site of production and profit making as well as new forms of solidarity resistance

and social reimagining We see examples of the city as factory in new place based political alliances as workers and the unemployed find common cause with right to the city struggles Demands for jobs with justice are linked with demands for the urban commons from affordable housing to a healthy environment from immigrant rights to urban citizenship and the right to streets free from both violence and racially biased policing The case studies and essays in *The City Is the Factory* provide descriptions and analysis of the form substance limits and possibilities of these timely struggles Contributors Melissa Checker Queens College and the Graduate Center of the City University of New York Daniel Aldana Cohen University of Pennsylvania Els de Graauw Baruch College City University of New York Kathleen Dunn Loyola University Chicago Shannon Gleeson Cornell University Miriam Greenberg University of California Santa Cruz Alejandro Grimson Universidad de San Mart n Argentina Andrew Herod University of Georgia Penny Lewis Joseph S Murphy Institute for Worker Education and Labor Studies City University of New York Stephanie Luce Joseph S Murphy Institute for Worker Education and Labor Studies City University of New York Lize Mogel artist and coeditor of *An Atlas of Radical Cartography* Gretchen Purser Maxwell School of Citizenship and Public Affairs Syracuse University
