chronicles an intimate relationship with arresting honesty and vividness Moving through grief and loss towards a renewal that never sidesteps the wholeness of experience Gander s new collection discovers an articulate language for the merging of exterior and interior landscapes Gander trained as a geologist walked along much of the 800 mile San Andreas fault toward the desolate town of his birth and found himself crossing permeable dimensions of time and space correlating his emotions and the stricken landscape with other divisions the fractures and folds underlying not only our country but any self in its relationship with others The result is this moving new collection that unforgettably describes a spiritual and physical journey With its confidential tones and candid self examination Mojave Ghost is Gander s most inviting and poignant book yet

A Book about Ray Ellen Levy,2024-10-15 The first full career survey of the idiosyncratic life and work of Ray Johnson a collagist performance artist and pioneer of mail art Ray Johnson 1927 1995 a k a New York s most famous unknown artist was notorious for the elaborate games he played with the institutions of the art world soliciting their attention even as he rejected their invitations In *A Book about Ray* Ellen Levy offers a comprehensive study of the artist who turned the business of career making into a tongue in cheek performance tracing his artistic development from his arrival at Black Mountain College in 1945 to his death in 1995 Levy describes Johnson s practice as one that was constantly shifting whether in tone in its address to potential audiences or among three primary artistic modes collage performance and correspondence art *A Book about Ray* takes an elliptical path circling around rather than trying to arrest in flight the elusive artist and his purposefully ephemeral art By crafting the book in this way Levy evokes Ray Johnson s art in the moment of its making and draws readers into the artist s world while making them feel from the beginning that they somehow already know their way around that world In exploring Johnson s scene readers will also encounter the artists who influenced him like Joseph Cornell and Marcel Duchamp and his friends and peers like Jasper Johns Allan Kaprow Robert Rauschenberg and Andy Warhol The work of such figures will look forever different in light of Johnson s subversive take on their shared aesthetic Suitable for readers both new to Ray Johnson and those already familiar with his work *A Book about Ray* is a complete and vital portrait of an American original

Colombia Fernando a writer visits his brother Dar o who is dying of AIDS Recounting their wild philandering and trying to come to terms with his beloved brother s inevitable death Fernando rants against the political forces that cause so much suffering Vallejo is the heir to C line Thomas Paine and Machado de Assis He hurls vitriolic savagely funny insults at his country I wipe my ass with the new Constitution of Colombia and at his mother the Crazy Bitch who has given birth to him and his many siblings Within this firestorm of pain Fernando manages to get across much beauty and truth that all love is painful and washed in pure sorrow He loves his sick brother and the family s Santa Anita farm the lost paradise of his childhood where azaleas bloomed and he even loves his country now torn to shreds Always in this savage masterpiece about loss as if in the eye of Vallejo s hurricane of talent we are in the curiously comforting workings of memory and of the writing process itself as recollecting time it offers immortality

"Science, Technology, and Utopias" Christine Filippone,2017-07-05 The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from

these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women s movement She argues that artists Alice Aycock Agnes Denes Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it conservative and constricting Motivated by the contemporary American Women s Movement these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery the museum and the dealer At the same time the artists also embraced these domains of knowledge and practice as expressions of hope for a better future Many found inspiration in the scientific theory of open systems which investigated problems of wholeness dynamic interaction and organization enabling consideration of the porous boundaries between human bodies and their social political and nonhuman environments Filippone also establishes that the theory of open systems not only informed feminist art but also continued to influence women artists practice of reclamation and ecological art through the twenty first century
