Gem Identification By his excellent scientific training and his extensive experience at the Gemological Institute of America Mr Liddicoat is well qualified to author an authoritative handbook Moreover he has had the benefit of the counsel and advice of Director Robert M Shipley and others at the Institute In the opening chapters the essentials concerning the important properties of gemstones are described in a lucid manner Manufactured stones and the instruments used for testing are discussed in several chapters The main portion of the book is devoted to the tests and procedures to be followed in the identification of gemstones which are grouped according to As the tests and procedures are outlined in great detail there should be no difficulty whatever in following them The book also includes useful tables of properties a glossary and various flow charts This handbook should prove to be very helpful in the making of accurate determinations of gemstones It is a valuable addition to gemological literature and will be welcomed by dealers in and lovers of gems
