The Economics of Wind Energy ,2009 **Cases on Digital Technologies in Higher Education: Issues and Challenges** Luppicini, Rocci,Haghi, A.K.,2010-05-31 This book focuses on the institutionalization of technology into education specifically discussing the integration of technology and new techniques into various areas of higher education Provided by publisher The Economics of Climate Change Policies Rainer Walz,Joachim Schleich,2008-09-27 In its latest

Assessment Report the Intergovernmental Panel on Climate Change IPCC 2007 projects that without further action the global average surface temperature would rise by a further 1.8-4.0 °C until the end of this century. But even if the rise in temperature could be limited to the lower end of this range irreversible and possibly catastrophic changes are likely to occur. Consequently the protection of the earth's atmosphere requires substantial efforts to reduce CO₂ and other greenhouse gas emissions especially in countries with very high per capita emissions. To limit the imminent rise in temperature in the Kyoto Protocol the European Union has committed itself to reducing the emissions of greenhouse gases by 8% up to 2008-2012 compared to 1990 levels. Within the EU burden sharing agreement some countries have to achieve even higher emissions reductions. Germany was assigned a reduction target of 21%. The entry into force of the Kyoto Protocol in February 2005 marks a first step towards meeting global climate targets but more ambitious action to reduce greenhouse gas emissions is needed after 2012 when the Kyoto targets expire. Under German presidency the EU has committed itself to unilaterally reduce its greenhouse gas emissions until 2020 by 20%. In case a Post Kyoto agreement can be reached the EU reduction target would be 30%. CEU 2007

Managing E-commerce in Business J. Botha, C. H. Bothma, Pieter Geldenhuys, 2008-02-27 Information and Communication Technology (ICT) is becoming indispensable in the spheres of business, government, education and entertainment. It makes Internet marketing, e-government, e-learning and online chat services possible. And its commercial aspect, e-commerce, is part of this trend. Today no business training is complete without the inclusion of at least the basics of e-commerce. But although e-commerce has opened up new opportunities it also presents threats and risks. The success of e-commerce hinges on security and trust. Every business manager should therefore have a fundamental awareness of the meaning of e-commerce and ICT security and risk management. This second edition provides guidelines for overcoming these challenges by exploring the ways in which entrepreneurs and managers should co-operate with IT experts to exploit opportunities and combat the threats imposed by new technologies.
