

# EARLY CHILDHOOD EDUCATION

Early childhood educators shape a child's foundation of learning during their most critical developmental period – the first six years of life. This PermacCharts® provides students and facilitators with an overview of ECE programs and several approaches to the discipline. As well, this chart covers descriptions of specific challenges ECE facilitators face, an overview of children with exceptionalities and inclusion programs, and an outline of what can be found in ECE centers and classrooms.

## WHAT IS EARLY CHILDHOOD EDUCATION?

- Early Childhood Education (ECE) is the teaching of children from birth through age six
- A facilitator enables learning by observing children's activity, providing resources, and guiding children's behaviour

## HOW CHILDREN LEARN

Children learn through developing positive relationships with others

### REINFORCEMENT

- Reinforcement refers to a positive or negative consequence that increases the chance of repetition of behaviour, defined by ABC format:
  - A) Antecedent (event prior to behaviour)
  - B) Behaviour (response to antecedent)
  - C) Consequence (follows behaviour)
- Positive reinforcement includes praise, encouragement, adult attention, play and toys

### How to Reinforce Play

- Infants: Offer immediate and consistent interaction
- Toddlers: Offer encouragement and praise
- Preschoolers: Support socialization through cooperation and negotiation
- School aged children: Enhance socialization and problem solving skills through interaction and group work

### PLAY

- Children learn through play, which requires a developmentally appropriate environment, and many experiences and adult involvement
- Sensorimotor activity: a learning process based on use of the five senses (touch, sight, smell, taste, and hearing)
- Critical periods: a time during which optimal development occurs
- Sensitive periods: a time during which learning occurs most easily

Infants (0-2 years) Dependent	Functional play: Intensely manipulate objects Repetitive play: Continually engaged in an activity Deferred imitation: Imitate previously observed behaviour
Toddlers (2-3 years) Semi-independent	Parallel play: Engage in similar play with similar materials alone but alongside other children Observant play: Watch activities without engaging in them Inclusive play: Invite observed behaviour to get a desired outcome
Preschoolers (3-5 years) Independent	Associative play: Play together with shared materials Cooperative play: Play together to achieve a common goal Constructive play: Use objects to build structures Symbolic play: Use objects representatively
School Aged Children (6-12 years) Independent	Dramatic play: Role play Competitive play: Play together to refine skills and achieve superiority
