John Considine,2022-05-26 This is the first volume in the trilogy Dictionaries in the English Speaking World 1500 1800 which will offer a new history of lexicography in and beyond the early modern British Isles The volume explores the dictionaries wordlists and glossaries that were compiled and read by speakers of English from the end of the Middle Ages to the year 1600 These include the first printed dictionaries in which English words were collected the dictionaries of Latin used by all educated English speakers from young children to Shakespeare to adult royalty the dictionaries of modern languages that gave English speakers access to the languages and cultures of continental Europe dictionaries and wordlists documenting other languages from Armenian to Malagasy to Welsh and a great variety of specialized English wordlists No unified history has ever surveyed this vast lively and culturally significant lexicographical output before The guiding principle of the book and the trilogy is that a story about dictionaries must also be a story about human beings John Considine offers a full and sympathetic account of those who compiled and used these works and those who supported them financially paying particular attention to records of dictionary use and its traces in surviving copies The volume will appeal to all those interested in the languages and literary cultures of the sixteenth century English speaking world Euclid Elements David

Bolton,2017-11-19 A new translation of Euclid s Elements together with a comprehensive introduction to each of the Elements books all contained in a single volume Euclid s Elements produced c300 BC superseded all previous attempts to identify the elements of geometry and became the authoritative work on plane and solid geometry number theory proportion and the irrationals to be relied upon and quoted by later Greek mathematicians This edition contains a translation of Euclid s Elements and discusses Euclid s methods the development of axioms postulates and common notions the establishment of proofs derived from definitions axioms and previously made proofs and the use of proof by contradiction Each of the Elements thirteen books is summarised and discussed in an introductory chapter There is a fresh look at Euclid s treatment of rationality and commensurability based as it was on comparisons of straight lines rather than numbers Geometry:

Euclid and Beyond Robin Hartshorne,2013-11-11 In recent years I have been teaching a junior senior level course on the classical geometries This book has grown out of that teaching experience I assume only high school geometry and some abstract algebra The course begins in Chapter 1 with a critical examination of Euclid s Elements Students are expected to read concurrently Books I IV of Euclid s text which must be obtained separately The remainder of the book is an exploration of questions that arise naturally from this reading together with their modern answers To shore up the foundations we use Hilbert s axioms The Cartesian plane over a field provides an analytic model of the theory and conversely we see that one can introduce coordinates into an abstract geometry The theory of area is analyzed by cutting figures into triangles The algebra of field extensions provides a method for deciding which geometrical constructions are possible The investigation of the parallel postulate leads to the various non Euclidean geometries And in the last chapter we provide what is missing from

Euclid's treatment of the five Platonic solids in Book XIII of the Elements For a one semester course such as I teach Chapters 1 and 2 form the core material which takes six to eight weeks Euclid's Elements in Hebrew Garb Ofer Elior, 2021-09-20

Euclid's Elements is one of the canonical texts that shaped our cultural heritage It was translated from Greek into Arabic and from Arabic into Hebrew and Latin There is little agreement about the textual history of the Arabic translations The present book offers for the first time a critical edition of two Hebrew translations of Books I-II by Moses Ibn Tibbon and by Rabbi Jacob A serious attempt is made to learn from the Hebrew translations also about the history of the Arabic text The edition of Ibn Tibbon's translation is accompanied by an Arabic text which was probably its source Rabbi Jacob's translation is compared to the Latin translation ascribed to Adelard of Bath probably based on the same Arabic tradition **Euclid's**
