Pediatric Therapy Catherine Rush Thompson, 2024-06-01

Research has become increasingly clear regarding the benefits of interprofessional collaborations in health care. Pediatric therapists have long recognized that coordinated care and advocacy for children and their families promote healthy growth, development, and participation in a wide range of environments. To this end, *Pediatric Therapy: An Interprofessional Framework for Practice* has been designed to engage students and clinicians in interprofessional learning experiences that cultivate collaborative practice and optimize the outcomes of those served. Dr. Catherine Rush Thompson and her team of contributors represent years of experience across the fields of physical therapy, occupational therapy, and speech language pathology. Rather than discussing each of these fields in isolation, however, the text explores professional roles and responsibilities, emphasizing essential skills needed for collaboration in a range of pediatric settings.

Key Interprofessional Concepts Covered: Foundations and philosophies that serve as a basis for pediatric care; Assessing infants, children, youth, and adolescents in various situations; Legal and ethical considerations impacting pediatric care; Unique issues encountered in settings where pediatric therapies are offered; Using current evidence and the clinical reasoning process for designing and modifying interventions. Each section of *Pediatric Therapy* offers case-based learning activities requiring interprofessional collaboration for clinical reasoning to optimize care. This approach encourages an appreciation of the importance of holistic care, as well as an understanding of the roles, frames of reference, and approaches favored by each discipline. Pediatric therapists and others who work in healthcare and educational settings will appreciate *Pediatric Therapy: An Interprofessional Framework for Practice* as a guide for developing the interprofessional competencies needed to achieve desired outcomes for children and their families.

The text begins with a general overview of the history and rationale for early childhood intervention, including the Individuals with Disabilities Education Act (IDEA) Part C program and Early Head Start, as well as a description of the need for speech language pathologists in early intervention. The majority of the text offers assessment and intervention strategies and tools, including specific tests and curricula, training resources, and the importance of using ongoing assessment for this young age. Strategies for coaching parents and collaborating with professional colleagues, as well as working within daily routines in natural environments for the child, all integral components of the Part C early intervention program, are interwoven throughout. The

text concludes with the importance of viewing children holistically taking into consideration all aspects of a child's being and acknowledging the interrelatedness of their developing skills as well as the importance of family in their development Speech language pathologists have a critical role in evaluation assessment and intervention for young children with or at risk for communication disorders Speech Language Pathologists in Early Childhood Intervention creates a pathway for investing in the principles and activities of early intervention that can lead to best practice and positive outcomes for this young population Disclaimer Please note that ancillary content such as documents audio and video etc may not be included as published in the original print version of this book
