Ghost Bears Exploring The Biodiversity Crisis:

Ghost Bears R. Edward Grumbine, 1993-08-01 In *Ghost Bears* R Edward Grumbine looks at the implications of the widespread loss of biological diversity and explains why our species centered approach to environmental protection will ultimately fail Using the fate of the endangered grizzly bear the ghost bear to explore the causes and effects of species loss and habitat destruction Grumbine presents a clear and inviting introduction to the biodiversity crisis and to the new science of conservation biology

The Abstract Wild Jack Turner, 2021-12-21 If anything is endangered in America it is our experience of wild nature gross contact There is knowledge only the wild can give us knowledge specific to it knowledge specific to the experience of it These are its gifts to us How wild is wilderness and how wild are our experiences in it asks Jack Turner in the pages of *The Abstract Wild* His answer not very wild National parks and even so called wilderness areas fall far short of offering the primal mystic connection possible in wild places And this is so Turner avows because any managed land never mind what it is called ceases to be wild Moreover what little wildness we have left is fast being destroyed by the very systems designed to preserve it Natural resource managers conservation biologists environmental economists park rangers zoo directors and environmental activists Turner's new book takes aim at these and all others who labor in the name of preservation He argues for a new conservation ethic that focuses less on preserving things and more on preserving process and leaving things be He takes off after zoos and wilderness tourism with a vengeance and he cautions us to resist language that calls a tree a resource and wilderness a management unit Eloquent and fast paced *The Abstract Wild* takes a long view to ask whether ecosystem management isn't a bit of a sham and the control of grizzlies and wolves at best a travesty Next the author might bring his readers up close for a look at pelicans mountain lions or Shamu the whale From whatever angle Turner stirs into his arguments the words of dozens of other American writers including Thoreau Hemingway Faulkner and environmentalist Doug Peacock We hunger for a kind of experience deep enough to change our selves our form of life writes Turner Readers who take his words to heart will find if not their selves their perspectives on the natural world recast in ways that are hard to ignore and harder to forget

Multiple Dwelling and Tourism Norman McIntyre, Daniel Williams, Kevin McHugh, 2006 The movement of people goods capital and information is a central aspect of living in the inter connected globalised late modern world Although this broader view of mobility is recognized this book focuses mainly on migration or the movement of people It examines multiple dwelling as a societal response to the major influences of increased mobility and amenity tourism The book also considers the modern day meaning of multiple dwelling how it affects personal identity and the meaning of home and its impacts on host communities and landscapes

[Animal Geographies](#) Jennifer Wolch, Jody Emel, 1998-09-17 Each year billions of animals are poisoned dissected displaced killed for consumption or held in captivity usually for the benefit of humans The animal world has never been under greater peril and

this broad ranging collection contributes to a much needed fundamental rethinking about our relation with it *Animal Geographies* explores the diverse ways in which animals shape the formation of human identity Essays on zoos and wolves for example reveal how animals figure in social constructions of race gender and nationality From questions of identity and subjectivity it moves to a consideration of the places where people and animals confront the realities of coexistence on an everyday basis by way of case studies of species such as mountain lions and the golden eagle It then examines the ways in which animals figure in the ongoing globalization of production and mass consumption illustrated by essays on the US meatpacking industry and meat production in the Indian state of Rajasthan and finally takes up legal and ethical approaches to human animal relations *Animal Geographies* compels a profound rethinking of the nature of human animal relations and offers a series of proposals for reconstituting this relationship on a progressive basis Contributors Kay Anderson Glen Elder Andrea Gullo Unna Lassiter William S Lynn Suzanne M Michel Chris Philo James D Proctor Paul Robbins Frances M Ufkes James L Wescoat Jr *Global Ecosystems*, 2009-04-22 NAPA Bulletin is a peer reviewed occasional publication of the National Association for the Practice of Anthropology dedicated to the practical problem solving and policy applications of anthropological knowledge and methods peer reviewed publication of the National Association for the Practice of Anthropology dedicated to the practical problem solving and policy applications of anthropological knowledge and methods most editions available for course adoption General Technical Report RM, 1995 **An Ecological Basis for Ecosystem Management** Merrill R. Kirschenmann, 2010-04-14 Theologian academic and third generation organic farmer Frederick L Kirschenmann is a celebrated agricultural thinker In the last thirty years he has tirelessly promoted the principles of sustainability and has become a legend in his own right *Cultivating an Ecological Conscience* Essays from a Farmer Philosopher documents Kirschenmann's evolution and his lifelong contributions to the new
