The Human in Command Carol McCann, Ross Pigeau, 2012-12-06 MAJOR GENERAL M K JEFFERY Command and indeed the human in command has always been key to military operations The complexity and tempo of modern operations make this statement even more true today than in the past However both the military and the research & communities have tended to treat command and control C from a limited perspective For too long command and control have been considered as if they were a single concept with control often dominating our study Indeed in many cases we have divorced operational C from the military institution itself resulting in disconnects and inefficiencies Then in an attempt to overcome these self-inflicted deficiencies we have pursued the Holy Grail of technology hoping that it would solve our C problems Only now as we start to realize technology's costs and limitations are we looking critically at C This book attempts to take such a look The contributions that make up this book are the product of a June 1998 NATO North Atlantic Treaty Organization workshop called The Human in Command Far from being purely an academic exercise this gathering brought together military leaders and civilian scientists to discuss C's central pragmatic and conceptual issues its assumptions its practices and its organization Indeed in recent years there has been mounting evidence that both our society and its military institutions are facing organizational crises
